Washington, DC 20460-0001**

RE: Docket # EPA-HQ-OPP-2014-0219

Dear Administrator McCarthy,

We are pleased to see that EPA is finally taking steps to consider volatilization drift. This important source of pesticide exposure has been overlooked for too long in the agency's assessment of pesticide risk.

Data from the Pesticide Action Network's Drift Catcher and state agency monitoring in several states clearly show that volatilization drift is affecting communities across the country. Many of the chemicals measured in on-the-ground tests are known to harm human health, and children are especially at risk.

The fact that 68 pesticides failed the screening test underscores the importance of this evaluation. Many of these chemicals — including the insecticide chlorpyrifos and the herbicide atrazine — are in widespread use and have been clearly linked to a range of health harms.

We urge EPA to finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results. Children and families in rural areas deserve no less.

Sincerely,

Pesticide Action Network and United Farm Workers

On behalf of the 15,425 signatories below, concerned citizens from all 50 states, Washington, DC and several Canadian provinces.

First Name	Last Name	Zip	State	Comment
Markus	Kr???_mer	52372	AA	We have to get these poisons out of our environment or we are going to have skyrocketing costs attempting to treat more cancers, hormonal disorders, digestive tract problems, autism spectrums in children. Most of the damage done can not be reversed
Jean	Molénat	34090	AA	
Denise	Trafford	T2V 3N6	AB	
Patricia	Stevenson	T6A 3W5	AB	This is definitely a step in the right direction. Thanks! Hopefully, something will be done if these assessments show serious problems with this kind of drift.

It is time we stop poisoning ourselves and the other creatures on the planet. Using poisons to grow food is not necessary and certainly is dangerous to all who live near its use. Please continue moving toward strong regulation and eventual end to the use of herbicides, pesticides and other dangerous chemicals on agriculture crops.

This dangerous, toxic chemical drift is DEADLY - - it MUST be stopped, NOW!

Why is there such a hold up on such poison substances? How long after knowing how toxic all these pesticides are are you going to drag your feet...children and people are dying or affected seriously...HELLO.. DO SOMETHING!

Children and families in rural areas need protection, and since many others of us travel in these areas, we also deserve protection. This is akin to the various chemicals used in furniture that emit volatile emissions that are dangerous to health. We, as a nation, are killing our- selves with these dangerous chemicals. Please Protect the children and families in rural areas as well as in cities.

Albert	Bechtel	98105	AZ	Dear Reader: I think that the worst example of volatilization pesticide drift, is the unknown number of schools across the commercial cropland - USA, where school-children are in their respective school-yards, at recess time, playing, and a crop-field adjacent to the school is under-going pesticide application, and these young, formative bodies are exposed to the lasting toxic effects. A screening tool is desperately needed! Respectfully yours, ~ Darryl J. Robbins

we need help!!

I am Jon Longsworth and I approve this message.

I am sorry that I can not give money to help this cause. My only income is social security which I am grateful for. However, I am totally against all these pesticide sprays period. They travel through the air and leach into our drinking water. I hope something positive can be done to stop all the poison.

Carlos	Rodriguez	94115	CA

So many "new" pesticides aren't necessary for good crop yields. We had more food than we could use in the 40s without these. What's the real agenda? Stop poisoning the food air and water. The future if our planet and humanity depend on this.

The health our children and citizens is paramount to corporate profits. PLEASE finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results!

Not only rural families are affected by pesticide drift. My husband and I often bicycle around agricultural fields in and near our Oxnard, CA, home. Apparently we are also affected by pesticide drift, although we have no resultant health problems -- YET.

We are killing ourselves for profit. We need to be able to eat real non-gmo food, without pesticides in them. Hopefully, this one email counts toward making a change to save all of our lives. K. West

I live downwind of a large tract of fields and feel and see the the effect of volatilization drift on the community. After they spray many people i know in the community have flu like symptoms. I think many don't realize it because the spraying is done without warning, so many people in neighboring communities don't even realize it's happening. Thank you.

Charles	Schmalz	95423	CA
Diane	Granahan	90026	CA

The 68 pesticides that already have “failed” your proposed screening test — make them candidates for volatilization —including atrazine and chloryprifos. Please take action on these results in a timeframe that prevents further health damage! Children and families in affected areas need targeted protection from all manner of damaging pesticide drift.

Health is wealth, we all know this saying and it is nothing to squander. These chemicals affect all living organisms and we deserve protection from exposure. These Agriculture producers have a responsibility to safeguard the ecosystem we all share. Its time the EPA took a long term view of how we are detrimentally impacted by harmful agricultural and industrial chemicals. We should have major incentives for these well meaning companies and famers to ho Organic!

Ask yourself how you would want your own family and friends protected and then act accordingly. Respectfully, Michael Allen
Santa Rosa, California.

Everyone deserves to be safe from pesticide exposure, in drift of any form. Unfortunately, many times those who are vulnerable, whether by age, children, or finances, are at risk for the highest exposure with little or no recourse. It is time to implement the tools that can stop this. Thank you

While you're at it, why not look into banning most pesticides altogether? It's become clear that other strategies work better and don't lead to an "arms race" where pests just get stronger and more resistant.

Airborne substances affect people more than they realize. They may affect mood and performance without the affected people knowing what is wrong. They may blame their bodies for problems caused by their environment.

Having lived in Eastern North Carolina in farm country pesticide/herbicide drift and re-drift was always a serious issue. Our home veggie garden was constantly being damaged by issues that could only be attributed to adjacent field chemical applications with no recourse for us but to abandon our attempts to feed ourselves from our own property. The time is come to give us all some assistance in protecting our personal space from drift and re-drift.

As a grandparent I have a particular concern about young children being exposed to the re-drift of these chemicals. My wife grew up being exposed to many such chemicals and she has had health problems like cancer and asthma, both of which could have been caused by this childhood exposure.

I've just learned about volatilization, please address this issue now! If as it is quoted, 68 pesticides have "failed" EPA's proposed screening test — meaning they are likely candidates for volatilization — including widely used, health-harming chemicals like atrazine and chloryprifos. The EPA needs to take action on these results in a timeframe that matters! NOW, thank you!

I'm glad that you're looking at this. Let's do it now!

Do the right thing.

Please take the poisoning of our nation all in the name of greed. Thank you, Kate Stanley

Please STOP poisoning The United States of America!!!

Thank you for taking every step needed to prevent all types of pesticide drift. Our water sources, wild animals, and our health depend upon additional safety precautions and prevention in this important area of regulation. The bottom line is that pesticides are not a necessity but a convenience to increase profits and they should never be allowed when harm to human health, water sources, sources of organic foods, and wild animals may be harmed. Thank you for everything you can do to step up regulations in this area.

CHECK OUT THE CENTRAL VALLEY

Congrats for looking into and possibly
regulating pesticide drift!!

Please do not diminish the health risks of
these pesticides!

We have got to get a handle on these
dangerous chemicals which are permeating
our environment and our lives. People
should not need to worry about what they
are breathing! No one should get sick
because some chemical company wants to
make money! Protect us all!

I wasn't aware of volatilization drift. It must be addressed. Pesticides are what they are toxins that harm us. We must have regulations in place to protect us. Upon EPAs finalization of screening, action must taken to correct exposure to us.
Please help save our people and our country for our future.

Go organic!

Mary	Correro	95336	CA
Cynthia	Pounds	95819	CA

I live in an agricultural region where there is high use of pesticides. We need every type of protection available!!

It is way past time for the EPA to rule on pesticide and other invasive problems that affect those of us who do not wish to use the land the way some agricultural interests do. Let's opt for healthy operations that support our planet, our bees, our biodiversity, our natural web of life.

Pesticides and the new ones that Dow want to have approved are KILLING our pollinators in record numbers. GMO's and pesticides have killed monarch butterflies and bees. We cannot continue to kill these beneficial insects or our food crops will fail and everyone will starve. Is that what the EPA wants? I don't think so! The people of this country and the world demand that pesticide use decreases NOW not in a year or more so that we can live a sustainable and pesticide free life.

If poisonous chemicals were banned, we wouldn't have to worry about drift or re-drift. Farm workers and neighbors wouldn't have to worry about the air that they breathe. Consumers wouldn't have to worry about the food that they eat. Nobody would have to worry about the pesticides running off and poisoning our water supply. This one product has managed to poison our air, our water, our soil and our food. Remind me again why these products are still being used.

Karen	Tanner	95949	CA

All pesticides are poisonous and dangerous. They are ruining this country and only serve to enrich chemical companies. All pesticide use should be outlawed. Permanently.

It is unconscionable that pesticides are used so heedlessly in the US. We're allowing them to harm our children's development, damage and kill our pollinators, and poison our food. The EPA must protect us!

Enough poison for profit!!!
Please reconsider!

No more poisons.

Stop treating people like they are worthless. We all deserve protection from dangerous pesticides. Many of them should never have been approved for use in the first place. But since they are approved, the least you can do is study drift and put rules in place to protect us.

Kenneth	Wilcox	95816	CA

You know what needs to be done, do it.

I moved into a neighborhood, in an estuary, where EVERYONE uses pesticides incorrectly! The "best case" and "best conditions" to "use pesticides safely" is a myth. Volatilization compounds the risk and is likely exasperated by incorrect use.

As a former farm-worker, this multiple volatilization poisoning brings to mind the re-drift and resultant contamination of all life down-wind, forever, it seems. We all share the same atmosphere, the same world ocean. All these toxins keep accumulating, and some of their break-down products may be more harmful. If you doubt this, consider the build-up in arctic & antarctic animals of contaminants originating from where farmers applied the materials, long ago. It's getting worse.

Louise	Davila	95543	CA
felipe	garcia	95965	CA

lets take care of our children so we can have a healthy future not a prescription laden one

Roxanne	Sotelo	90601	CA
Margaret	Rogers	94062	CA

EPA-Your job is to keep people safe. Period. I believe every chemical company should be required to prove their product is safe for people, animals and the earth before it can be sold. Sadly, it's not how things work here in the US. We, the consumers, residents and workers are paying the price for the lax laws that allow these companies to make and sell these dangerous products. Stop letting the chemical companies profit at the cost of our health.

Shayne	McCool-Peller	92130	CA
Janet	Lawlor	92021	CA
Jennifer	Howard	B3Z 1V8	CA
Bert	Bannister	94960	CA

Why do you think there are so many health problems? We need to have stronger guidelines, at least up to par with Europe's!! I have a garden in our backyard, yet I have NO bees pollinating it! I'm having to self pollinate just so vegetables grow!! This has to be because of all the pesticides being used in the US. Disgusts me!!

Aviva	Myers-Taylor	92107	CA
TA	Adams	92336	CA
Anna	Mashevcich	91423	CA

Besides pesticide drift, another harmful drift is from fields planted with genetically-modified seeds which cross-pollinate non-GMO fields, contaminating those crops.

Thank you very much for your support on this important issue!

We need to go to a sustainable life style for our kids!

I think Enlist could be your first consideration. Sheesh. Really, it seems like the EPA stands for "ENSURE PESTICIDE APPLICATION". Have you noticed any health problems with our KIDS lately??? This is like when they had smoking sections on air planes, the smoke didn't stay in just that section! Get the drift?!

Please help protect people from this poison.

Pesticides are hazardous to our health. I choose to not ingest them in any form. The fact that they are so heavily used and blow in the wind and then later vaporize and are again spread is infuriating to me. Don't the people lining their pockets with profits realize that these pesticides are affecting them and their loved ones? How can they be so irresponsible?

We really need to come down hard on these chemical companies and what these jackasses are doing to our food source !

Thank you!

We have no idea the harm we are doing over time with the accumulation of different chemicals in the environment. We may have children and grandchildren exposed to things at sensitive ages that can cause problems we don't know about. There are better ways to do things.

We had a tragic incident when our dog collapsed the afternoon after pesticide dispersal (Santa Clara County). She'd just had her wellness checkup & all organs were functioning. All neighbors & family knew she'd been jumping, running, happy the day before. I spent thousands of dollars and so much heartbreak trying to save her life. County Vector refused to test or treat her for pesticide exposure, but it can't be ruled out that a happy living creature w/in 12 hours of exposure to nothing new in her environment except pesticides succumbed to drift. We have not stopped mourning this unnecessary loss. Please find better ways to assess safety before declaring pesticides safe for humans, pets, pregnant women, developing youngsters, people w/ lowered immune systems.

Don't poison our kids (and our planet!!!)!!!!

The fact that 68 pesticides failed the screening test underscores the importance of this evaluation. Many of these chemicals — including the insecticide chlorpyrifos and the herbicide atrazine — are in widespread use and have been clearly linked to a range of health harms. We urge EPA to finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results. Children and families in rural areas deserve no less.

You are killing us by allowing the use of these toxic pesticides to go into the American Food supply. Shame on YOU!!! I hope they construct a monument of shame listing everyone involved in GMO's, and toxic pesticides. You all belong in jail.

Who is making money off krap like this. Why else would the EPA CONSIDER something as horrible as this.

I am very concerned for my health, my children's health, and the health of farm workers and their children, other children in other communities, and all people everywhere. I am also concerned for wildlife and the health of nature itself.

People over profit :)

I suffer from severe and potentially fatal Multiple Chemical Sensitivities aka MCS. The problems I suffer due to volatilization of pesticides and herbicides used in my residential neighborhood has made my daily survival a constant battle. This is a problem that has gone on for years as your agency well knows as I first contacted you for help regarding my situation back in the 1980's. Of course you did absolutely nothing about it. Instead the EPA deliberately allowed the problem of volatilization to continue causing untold harm to countless others including children--especially those in rural agricultural areas. That was shameful and inexcusable on the part of the EPA. After all these years would you please do your job and use the volatilization screening tool?

When I go to the market I can choose organic vegetables for my family. I cannot choose to have the air be clean and organic because of redrift of pesticides. My closest friend grew up in California's Central Valley where atrazine is commonly sprayed. She developed breast cancer at 38 and had a double mastectomy. She ate only organic food for years, but it wasn't enough to prevent cancer. EPA can change this. Please protect Americans from pesticides.

I grew up in a family that grew its own food. We grew all sorts of vegetables, fruits, and berries. We made our own jams, jellies, grape juice, and canned foods for the winter. Our foods were delicious. I felt good after eating them. In the last 20+ years the quality of our food has gone way down. It does taste good and I don't feel good eating it. I had to stop eating food from the big chain stores because it didn't taste good and didn't feel good to eat. I buy my produce from organic non-GMO sources and I notice a huge difference in the taste and how it feels. Also, the tone of my body is changing now that I am eating organic non-GMO. I feel that those GMO foods with pesticide dressing were making me sickly and my body mushy. Farmers used to be able to hold their families up as an example of their fine foods. These days big agriculture farmers hide their procedures from the public. I never agreed to be someone's experiment. Please support the well being of America and our future by labeling GMO foods and eliminating the toxic substances that are sprayed on them.

Action is urgently needed to save our bees. Our lives depend on it. Please, consider this issue your Priority Number ONE. Thank you.

				It seems more than irresponsible for the EPA to allow any pesticides into our soil and groundwater. It seems criminal to me. No one should be allowed to dump chemicals and pesticides--which all drift--into other people's soil. Stop pandering to the companies who produce these chemicals and pesticides! Do the right thing!

				I am not against GMOs in general, but I am when they promote greater pesticide use. We should not be using these chemicals at all - but at least in very minimal doses. If Farmers would get into the practice of crop rotation and layered crop planting, we would not require the use of these life destroying (& I'm not referring to insects) chemicals. Read Silent Spring! R. Carson was right...50 years ago!

It would be nice if the upon request the EPA would set up drift catchers on residential properties within close range to pesticide spraying. Also, I would like to see drift catchers being sold online so that anyone who wants to test for pesticide drift can easily do so without having to rely on the EPA.

I AGREE ! Businesses who use these pesticides, need to be held responsible for the DRIFT and/or RE-DRIFT.

This issue is critically important, especially with new information that pesticides may be implicated in helping cause autism. Drift of pesticides is drift, no matter exactly how it happens. On another topic, I'm also very concerned about the amount of glyphosate (Round-Up) is finding its way into the food supply. We really need to reduce our exposure to poisons of all kinds!

Claudia	Gibson	94930	CA
L	Johnson	94706	CA
Elizabeth	Patterson	95482	CA
Kimberly	White	94702	CA

We are destroying bodies with toxins. It needs to stop!

Furthermore, we have every right to know what is in the products we may be exposed to in our air, water and food including what the manufacturer decides is the active ingredient and all the other ingredients. These unknown ingredients are a major part of pesticides, a contribution to poisoning the Sierra mountain forests and contributes to global warming. Right now we in the Santa Clara Valley are being fogged to kill mosquitoes and 96% of this product Zenivex is not disclosed. Our right to know should obviously trump trade secrets. If it does not, the product should not be allowed.

this must happen for the good of all

I can tell you this stuff makes us sick, children & adults. Just this week the soup of VOC's, insecticides and pollutants making up the ozone in Sacramento and places northward has made my own family unwell. By the time someone figures out how to "prove" that their illness comes from this chemical stew of poisons, it's too late for most of us. This stuff has NO PLACE in our world, period. The EPA needs to actually protect both the environment and all living things--isn't that the point?

Our family traveled to Canada one summer during my dad's summer vacation from teaching. We camped in our tent trailer and had a great time, but one afternoon a plane flew overhead and sprayed the nearby fields with pesticides. Years later when I began to have headaches. the Dr. asked if I had ever been exposed to pesticides and I had to recount what had happened that one fateful summer. It is imperative that the EPA stand guard to protect our precious children from the use of pesticides, I am the daughter of a farmers daughter and we owe it to our children who live in rural areas to make sure we are doing all that we can to assure that their health is not in jeopardy.

This is the responsible thing to do

I have survived two cancers. You have a duty to protect the Citizens' health. The FDA is too far gone to do the right thing. Hopefully there are still a few good souls working for the Government. Thank you.

Environmental PROTECTION Agency, please do the job you are charged with.

Now please!

Please keep pesticides to a bare bone minimum!

This volatilization drift is UNCONSCIONABLE & must be stopped NOW! WE the people have spoken....

We had to move to the mountains because we get so sick from neighbors' and other pesticide drift...
I so appreciate your candor and commitment to a better way and life for us!

I have been made extreemly sick by volatilization drift. I understand first hand what a health hazard this problem is. It is vitally important to so many people that this issue be addressed.

Please! Now is the time.

I am an organic farmer in Colorado and am very concerned about pesticide drift from my neighbor and the affect it may have on my livelihood.

EPA really so are for making people unhealthy.

Celeste	Rossmiller	80010	CO
James	Everitt	80033	CO
Catherine	Balog	80501	CO

Pesticides have always fallen under the category of chemical warfare. It's time to ban these deadly substances and change the mentality of war. When we work WITH nature, we can find alternatives that are healthier for everyone and everything.

Thank you for seriously considering this. i would love to see the EPA taking a much stronger stand on regulating the healthfulness, toxicity and quality of our food.

Our children are our nation's most valuable treasure. PLEASE PROTECT THEM! I'd prefer it if you would PLEASE BAN ATRAZINE, I know you don't believe the independent studies, but if they turn out to be right, this is a real danger to our children. YOUR CHILDREN.

If we want for any chance to catch up on the cumulative effects of the many & massive amounts of mostly untested (And, much of the cumulative & grey area effects of the tested / biased tested) synthetic wide-ranging chemicals; along with consumers, the EPA still has potential to lead towards being a major part towards bringing sustainable health care costs through better / proactive actions towards a much better world (than many synthetic chemicals are resulting in). Thank you for actions towards much better.

The EPA is a joke. They are bought and sold to the highest bidder/lobbyist/congress. Fracking is a perfect example. Bought. And. Sold. Petition the EPA. Lets get an educated human being making the decisions there. Someone well versed in the sciences, chemistry, and physics.

We have means to do something about this serious problem.

Please address this NOW!

No more drifting and redrifting of pesticides!

Thank you for putting children's health first!

All politicians have to ask themselves, would they want their children to be within the drift of pesticides?? Really???

I urge that you continue to take strong action against hazardous pesticide use

JUST DO IT NOW!!!!

I have cancer from working with pesticides (supposedly 'safe' pesticides if used according to the guidelines), even though I wore the proper clothing and used a respirator... The products are as toxic as can be, and the companies have been given a 'pass' by too many regulators.

Debra	Abbott	34286	FL
Donna	Pemberton	32926	FL
Patricia	Locke	33767	FL

My wife and I live nearby a industrial farm (Syngenta Flowers) Alva, FL. Since 2009 we have been exposed to chemical drift from this farm. We have reported and oily petrol chemical residue on our out door pool and unusual chemical ordors to the Florida Dept. Agriculture. To date the atomized spraying continues. Our Government is failing to protect us. HELP!

I also urge you to include in your evaluations the fact that these pesticides may break down into even more harmful chemicals, frequently even prior to use during storage and transport, and to determine the impact of those breakdown products as well.

Cheryl	Gross	34232	FL
Susan	Heckel	34104	FL

Thank you for taking action.

Volatization of pesticides needs to be addressed. Remember how chlordane and chlorpyrifos "redrifted" into home interiors as a result of termite applications, even when "properly" applied as crack and crevice treatments or trenched around foundations. Residues were found inside the home, especially on stuffed animals and children's toys! Please address this issue to protect children's health and farmworker health.

Not only animals, children and families but the elderly here in Sarasota are affected by the pesticides and re-drifting. Condos hire companies who tell us that what they are "spraying" is "safe." There's no such thing as safe when it comes to pesticides. Help us!

robert w	svetlik	32177	FL
Nico	Gumbs	32808	FL
Diane	Finney	34747	FL

Good news. Another thing to consider. If pesticide drift is so harmful, what about the pesticides that are absorbed into plants and ultimately end up in our bloodstreams and organs. This happens on a daily basis.

Drift is dangerous! Please stop the spread of poisons that cause cancer to develop! Please continue to do what you can to protect the children for this generation of children are experiencing the effects of chemicals in-vitro >> till death. We must use natural alternatives and drop harmful chemicals for the sake of the children! We all know many of these chemicals are not necessary as in Roundup - vinegar works just as well without the side effects.

About pesticides they should be all banned. We live in the 21st century its time we developed an organic way to combat weed or any organism that attacks our plants and crops . We are killing our insects and mainly the bee. Not even the pharmaceutical companies that are behind all this can afford to kill bees who are the many resource for food. So it's time they start researching for a better way to protect our plants and insects. I believe no chemical should be sold it is time to fight against this companies who produce poison not just a type of poison but all of them. Who knows perhaps we are still on time to save nature. 				<p>The rates of autism are increasing, more people are having trouble conceiving children, more people than ever are developing cancer at a young age- these are all signs to help us understand that too many chemicals are permeating into our bodies, the food we eat, the soil, the water and now after all these years we are seeing the results of all these toxic pesticides and insecticides that have gotten into our bodies, our earth, our ocean, rivers, streams and are affecting humans and animals. Please help us save future generation. Knowledge is power!!! Please help provide legislation to reduce the number of harmful chemicals, pesticides, insecticides that are used in the America. Organic produce should not be an expensive choice for wealthy and educated. It should be available to everyone...food with hazardous chemicals. WE need to stop GMO's too so Mosanto can stop making stronger chemicals for farmers to spray. Please everyone in that we have voted into office do the right thing and speak up!!!</p>
Seema	Jones	32952	FL

Dear Ms. McCarthy, First, let me congratulate you and tell you how excited I am that you are heading up the EPA! I am very excited about our environmental future with you at the helm. In regards to this particular petition, I have long been concerned about the drift of unnecessary, excessive spraying in my densely populated neighborhood. This spraying is not being done by actual trained and certified techs, but lawn maintenance personnel. This dangerous practice must be controlled and monitored more stringently and bear in mind the effects to marine and riparian borders...in my case the Chattahoochee River area.

STOP THESE POISONS, NOW!

Pesticides of today, glyphosphate and others being considered are doing potentially a lot more harm than perceived good as touted by pesticide manufacturers, and drift and secondary drift are two of the biggest, affecting the health of children and adults anywhere near the drifting pesticides, and crops in adjacent areas catching drifting pesticides-potentially ruining other crops; especially organics losing their creditation because of drift, as I have read about.

Poison pesticides drift with the wind just like poison gas.

I am very concerned about the unknown health impacts pesticides are having on the environment and our bodies. Please finalize the volatilization screening tool and move quickly to implement the assessments. EPA take ACTION. Use the tools to prevent further toxic exposure to harmful chemicals. Our people deserve protection from the drift. Act NOW!!!

stop killing us! you won't have anyone left to vote on critical issues like this one!!!!

THANK YOU FOR YOUR TIME.

Please use the tools that you have access to. Only the EPA can stop this rash of mutated food that is poisoning all of us. A few dollars does not justify the contamination of our food and water. Look to Cuba. After the Soviets stopped shipping them fertilizers, they figured out how to get 33% more produce per acre sans fertilizers. If they did this in the late 80's and early 90's we can surely do it now.

Doug	Mishler	30560	GA

here in hawaii monsanto is destroying our ecology of the land ,the reefs and making people sick with their pesticides .. I say BAN PESTICIDES UNTIL THEY PROVE THEY ARE SAFE !!!!!!!!!!!!!!!!!!!!!

DO IT, and QUICKLY! Due to the EPA's slowness on addressing pesticide drift - MANY families are suffering HORRIBLY in Hawai'i. No, we don't know for sure if these many cancers and the high rate of birth defects are caused by the massive use of pesticides used by the biotech companies in Hawai'i - because our health dept. STOPPED collecting the birth defect data nearly 10 years ago. Let's just put it this way, if it quacks like a duck.... Kaua'i doctors and nurses have said they have an infant heart defect that is TEN TIMES the national norm! Also, I know of at least 12 cases of babies being born with their intestines outside of their bodies. (gastroschisis) SOMETHING MUST BE DONE TO FIND OUT WHAT THE HELL IS GOING ON IN HAWAI'!!!!!!!!!! Please do your job! MOVE QUICKLY to finalize the volatilization screening tool!!!!!!!!!!!!!! You're killing us here!

I live on the island of Kauai, Hawaii and the gmo companies here spray about 16 tons of various chemicals a year on 12,000 acres of GMO corn. The people on west side of the island have to shutter and close their window because the spaying is very close to their homes. The west side has had an increase in cancer cases 18% higher than the rest of the state of Hawaii and also many birth defects. They are currently in a lawsuit against the chemical companies.

Protect our Keiki

I live on KAUAI and Pesticide drift is literally killing us here!

We appreciate all you are doing to protect us and our beautiful land and water. Thank you!

The willingness to expose everyone to the dangerous pesticides and to continue to harm the child of our future. Harming our environment, making our soils nutrient deficient and creating a food source that will no longer have the nutrients that our bodies can use.

PLEASE FINALIZE THIS VOLATLIZATION SCREENING TOOL! It will save lives: As someone living in Hawai'i where this problem is RAMPANT, I speak from first hand experience, having suffered the "second hand" health consequences of this drift: It is a NECESSARY step to ensure the well being of our people, especially the young, the failing in health and the elderly. THANK YOU for taking this step to protect our people!

I believe strongly in this research. My daughter has amenorrhea. While we can not prove that living next to a field that has been sprayed all of her life, she does have residue in her body and, we eat a vegetarian diet. Chances are she has been affected by drift. I would like to see research to prove the effects of pesticide drift.

As a mother of two young girls, living right next to, as well as in the water shed of crops that regularly have sprays applied I am very concerned. My daughters and I all suffer from autoimmune diseases. It is time to make this country reflect our values-a safe place for children to develop into thriving, contributing adults. It is entirely possible to grow things in a way that at the very least does not harm those around the production, or those consuming/working with the crops. There is only the possibility of impacting pocket books of those who already have plenty. Those who are already working could work for outfits growing in a way that doesn't harm ourselves. Please put your knowing-both your heart knowing and your head knowing into practice. In this I will stand with you. Please take action.

This is extremely important! We need to protect our families (and sensitive crops) from volatilization drift of toxic chemicals!

Please involve young farmers in this survey (especially from the farm organizations like Farm Bureau, Farmers Union and National Farmers Org.)and support rally! I also would encourage that the most and heavily used chemicals like RoundUp (Glyphosphate) are prioritized in the testing evaluation. Please let us know how we can also give some help for "from-the-farmer-perspective". I am a lifetime farmer at heart and professional agricultural consultant in semi-retirement.

get with it make living safe for everyone!

We need to make changes NOW. All these pesticides are dangerous, why does the US allow all this pesticide use???????????????????? Let's stop acting like it doesn't matter.

Debbie	Sury	60136	IL
--------	------	-------	----

				As a small, family-run garden seed producer, I've already been directly affected by herbicide drift of glyphosate on my Solanaceous veg. I'm thankful though that our problem is herbicide drift and not pesticide drift because the thought of my 2 year old daughter being exposed to volatized pesticide fills me with an immediate strength that comes from a father's only child being put in harm's way. Please, please tighten your strictures on the chemical drift of all kinds but most especially pesticide drift.

				I live in a rural area surrounded on two sides by farmer's field that is constantly sprayed with chemicals, two to three times a year, and some of these chemicals really drift. Sometimes after they spray you can't even stand to be in the yard because the smell will knock you over. There is way too much spraying of toxic chemicals going on in agriculture today.
Al	Trutter	62536	IL	The fact that 68 pesticides failed the screening test underscores the importance of this evaluation

It's great to see the EPA interested in regulating drift. I and my family live in farm country and we lose several days a year because we have to stay indoors when our industrial farm neighbors spray chemicals on their farms. The health effects are immediate and redrift means that we can't get away from it entirely until winter. The forest on my property is also adversely effected. I hope this will become a reality for the EPA. -Heidi Brelsford.

Please stop the contamination of our land.
Please do your job...protect the
environment. Stop the Fracking. Stop
Monsanto. Thanks

				<p>am finally realizing the dangers to my health, my families health and the general publics health. Each year it gets worse and no one seems to care. I know that fighting big business like Monsanto and Dow Chemical is not politically tp any politicians advantage but is not standing up for the American citizen worse. The time is coming that we will remember this at the polls. Why don't our politicians stand publicly for what we the citizens demand. I challenge you to speak out and set up a news conference to address the poisoning of our food supply and the air we breath. The Medical finding have proven this to be true and its time to show your true colors. We don't want any more of your general letter telling us that your just listening to our views. We want action BEFORE the damage is done. Don't give in to big business like in the past. Stand up now and don't respond unless you have something solid, something that you are willing to take action on now. If you don't take action now the future is lost and big corporations will continue to control You, our Country and our lives. This a Moral Issue and its your moral duty and responsibility. Do whats right for America and get serious about this National problem now!!</p> <p>when the farmer across the road from me sprays this poison it does my organic garden/pesticide free yard a real disservice and i end up having to take all the precautions anyhow- this is absurd</p> <p>Families living in rural areas need protection from pesticide /chemical application drift and from re-drift issues, too. As a beekeeper, I'm especially concerned about human health effects and bee kills/hive collapse due to this irresponsible chemical usage near our home.</p>

Please act quickly to protect the children and communities from "drift"...

Before 1933 everyone ate organic food; and everyone enjoyed some of the lowest food prices in any time in American history. Then petroleum-based pesticides and herbicides came along that promised higher yields. No one had any idea how toxic these compounds were, nor the foggiest notion of what long term effects lay in store for the environment or the people who ingested them. Now even the farmers who don't like using poisons must use them if they want to buy insurance for their crops. What gains can be measured in increased yield are lost to farmers due to increased fuel and chemical costs. Farmers know how harmful these chemicals are, but are tied to an endless "hamster wheel" of artificial economics. In this cynical atmosphere it is consumers, farmers and the health of the land itself that suffer; it is the chemical companies that profit at our expense. No one wants poison on their food!

Please it's completely unfair that farmers are spraying and the sprays are coming on our properties and there's nothing we can do about it when it's toxic! Is it legal for somebody to spray on somebody else's property, because that's exactly what's happening. I'm very passionate about this issue and something needs to be done because my children are being exposed to the pesticides sprayed in our farming community.

Here's a useful analogy to understand this "other" kind of pesticide drift: When you cut an onion, vapors are released into the air and a sulfur-containing chemical makes your eyes tear up. You can't see it, you're not necessarily smelling it — but you can feel a physical effect. It's the same idea with volatilization drift.

I am a Veteran, Active Voter and TaxPayer.
As a Veteran I put my life on the line for
Democracy.

As someone who occasionally had trouble
breathing - volitization worries me greatly.

Gina, Thank you for being our voice in the
EPA.

Children and families in urban areas deserve
protection, too. Some homeowners douse
their yards with pesticides and the effects a
day or two later can be overwhelming.

Thank you for evaluating this very important topic!

Our air should be clean and free from the illnesses resulting from pesticides. Harmful pesticides should be discontinued and companies who use and produce them penalized and or shut down. The planet needs us to be good stewards. Its past time we stop using harmful chemicals in the production of food!

Thank you.

No pesticides is the true answer. Stop poisoning us. Too many of us are getting sick and dying from our food and its production. Arent we supposed to be nourished and healthy from a healthy diet?

... ..
suffered personal harm from my neighbors unrelenting use of commercial chemical lawn applications. The herbicide 2,4-D has been connected to dogs increase in bladder and other cancers, the most susceptible are Scottish Terriers (my dog) having a 10-fold risk. Because of this I cannot walk my dog in my neighborhood where there is rampant lawn spraying. I also have to have her urine tested every 6 months. My yard is a butterfly, bird and bee oasis in the heart of Portland. Last summer we had no butterflies anywhere in Portland or my yard. My bees are dying and all the wildlife is declining. I believe even bats, whose sole food source are insects, are dying because of eating insects who have been subjected to pesticides like my neighbors. Two weeks ago her yard was sprayed with Merit Plus Fertilizer and Cross Check - two highly toxic insecticides. Immediately my bees began dying and we could not go outside or open our windows because of the vapor fumes. I have gone before the Maine Board of Pesticides to file a complaint, and am told there is nothing I can do as a homeowner, that it is at a legislative level. There are no local ordinances to protect me or my property and wildlife either. I believe that

				I was poisoned as a child from living downwind of Dow Chemical in Midland Michigan. As a result, I have multiple chemical sensitivities and chronic health issues which dominate my life and have caused me to live in poverty. They should be paying for my health care. don't let this happen to more kids

				when 24d and round up were sprayed on 40 acres across the street. every time we had steamy hot days it sent me to the ER only to find that if I left the area I didn't get dizzy and pass out. when he sprayed it my husbands cancer took off like a rapid fire. I fell to the floor and could not move for 4 hours totally confused. weak in like a drunken stupor. This is my home and I can not stay in it due to all the spraying across the street where all my air comes from. my two children and myself have thyroid conditions and no one on either side of our family have this. Please find that our lives matter and stop harmful sprays in our air and dust that we have to breath.

farmers use pesticides to increase crop yield and to protect their financial investment. I do sympathize with the farmer because I love the fact that they are making a living off of the land, however; as a beekeeper I have a first hand view on how the pesticides have affected the bees. It is truly eye opening and I consider the now documented pesticide related deaths of bees across the world to be something of a canary in the coal mine phenomena. I cringe whenever I see someone spraying pesticides such as Roundup. I never had children but I know that what we are doing with the environment now is going to greatly affect future generations. Additionally, I abhor the idea of my neighbors' pesticides drifting over into my living area. If they only knew the toxicity of the pesticides that they are using I am sure that they would not want to expose their children and grandchildren to them. I am sure that you have seen sold footage of children running through government sponsored DDT sprays--before the effects of DDT were known. Aren't we more sophisticated than that now? Will the money in the hands of the lobbyists (representing chemical companies) make any difference when we are all dying of cancer? Or when

Do the right thing before everyone has a toxic brain and body

We are living in the shadow of multi-national corp. R.D. Offutt's(potatoes) many growing fields and they keep adding more. We understand the problem of pesticide drift and feel it is vitally important to get this under control. Thank you

EPA, do your job!

Thank you for undertaking this task of addressing drift. So many health problems for the health of our country, for children,adults, pets, wild life, etc. As you found out, these pesticides are not limited to just the area sprayed. Neurological problems can be traced to pesticides and I so appreciate the endeavor of the EPA to correct this problem.

Good Job!

Met a woman who lived in a small rural community that had a many cases of cancer. Both she and her husband had had lung cancer though they were both and had always been nonsmokers. He was in the hospital for his 3rd round with it and she wasn't sure that he would make it.. They and others in the community believed it was caused by drift from the farmers spraying pesticides and herbicides.

Thank you for caring for your neighbor. I have felt the drift - burning in my lungs 2 1/2 miles from the spraying. We see more and more of our people having many cancers and etc., over the years. The \$ means nothing when one doesn't have their good health. Products shouldn't be sold to our neighbors around the world either if harmful to us, and we know many are. May those who go for health rather than the \$ be blessed.

My mild asthma has now advanced to having to carry an Epi-pen due to severe reaction from anhydrous ammonia and pesticide exposures. The EPA fined two local ethanol and burning/electrical producing plants that I live down wind. I now know why my dog lost his toe nails, they fell off one at a time for a year. Soon they want to burn practical board that has toxic glue in it. I JUST want to live and NOW there is more "drift" ? Sincerely

After years of pressure, EPA is poised to take action on the "other" kind of pesticide drift: volatilization. This kind of drift happens hours or even days after spraying. Pesticides that settle on soil or plants can become vapor and "re-drift," spreading far and wide. EPA has finally developed a new tool that measures whether a pesticide is likely to vaporize and re-drift. The agency needs to hear that we like this idea, and want them to take meaningful action on the results — and soon. I urge you, the EPA, to protect children and families in rural areas from all kinds of pesticide drift. It is your job to protect all American citizens--and especially the children. Do your job.

				Volitization of the potato fungicide chlorothalynl is a huge problem in the potato growing region on Minnesota. 50,000 + acres of potatoes are planted in northern Minnesota every year, Chlorothalynl is applied every 5 to 7 days during the entire growing season. The potato industry is creating an ecological dead zone in our state. Please undertake a serious evaluation of all forms of pesticide drift.

I have sensed this ~ for years, making important decisions as to whether or not to Move into a community surrounded by Commercial Farms ~ tasted it in the water, smelled it in the air ~ Finally, someone has the scientific Tools to Trace This! I Know it is affecting Our Children, And US. Time to save our CHildren, or in Ten Years, 1 in 2 Children will have a Learning Disability, in a recent Harvard Study of the effects of Pesticides on Brain Development. Time to Change the Over Use and Under Study of Pesticides, before we have No One ~ ,be they Human, Plant or Animals, including Our Great Seas Fisheries ~ left.

Thank you for doing this important work for us, our children, our planet earth :)

Dear EPA Administrator McCarthy, We are counting on you to protect children and adults from volatilization drift as well as other risks from pesticides. Please take action quickly to protect us from the health risks posed by these pesticides. Please finalize the volatilization screening tool and use it to assess the risks of pesticides and use the assessments to stop harming those in rural communities who are exposed to so many ag chemicals. Thank you. Joan Benjamin

Please be very thorough in your evaluation and do not allow loopholes to remain on this issue. Our families and our environment depend on this. I am a beekeeper too and likewise see this as a most important issue to protect our bees.

pauline	wolf	58230	ND
---------	------	-------	----

this has always concerned me since my property is smack in the middle of sprayers by land and air.....I WAS HERE FIRST and they have invaded my health and peace-I moved out in the middle of no where to get away from all the damage humans do....they followed me-my bee hives had to be moved-they were dying thank you Pauline wolf

from organophosphate insecticides terbufos, chlorpyrifos and phorate on surrounding sugarbeet fields, we here in the northeast corner of North Dakota, beg of you to do the right thing. Resident bystanders are at the mercy of neighboring farmers and there is absolutely no regulation or control over this horrible exposure by our state pesticide authorities who are under the direction of the North Dakota Ag Department. Our state health department, including air quality and pollution division, simply shoves it off to the ag department, and they will address it only if it is applied "off label" - there is absolutely nothing that they do to address the dangers of volatilization drift. We have no where to turn for help. We smell these organophosphates in our air for up to two weeks following application, regardless of how they are applied, and regardless of whether they are applied in spray or granular form. This year alone, the field surrounding our home had both terbufos and phorate applied to the same crop within three weeks of each other. There is simply no escaping it, and we receive no assistance from EPA, the ND Ag Department Pesticide division or anyone else. Please, please do the right thing and prioritize human health over monetary

Pesticide drift is very harmful.

It makes good sense to do that.

The Dept. of Agriculture must get involved as well as EPA since 2,4-D volatilization is causing sever to catastrophic problems in vineyards, not only decreasing yields but killing plants!

Dear Gina McCarthy: Please DO THE RIGHT THING, and limit *ALL* pesticide use. *YES*, we *CAN* have industrial-scale ***ORGANIC**FARMING*. We do NOT need all these TOXIC chemicals sprayed willy-nilly into our precious *HOME* - Earth, our *MOTHER*. Love your Mother Earth, don't chemicalize her! FUTURE PROFITS depend on what you do today!

This must be viewed as lethal....
Think about the future!

Dear Administrator McCarthy, I have seen first hand the harmful effects of pesticide drift on my own children and whether or not there is a law, I think it is criminal to expose children to these toxins. Thank you for taking action to remedy this situation. Sincerely,
Marlene Friedrich

I'm a victim as well as my children of this "drift". I had crop dusters in Pinal County, AZ spray me not once, but TWICE!!! The pesticide drift landed all over our then home and property. We were forced to move in fear of what these chemicals would do to the children. My then four year old almost immediately started suffering severe asthma attacks! The pesticides caused my cat AND dog to die of bronchial pneumonia after being exposed to the chemicals! Our backyard was Particulate 10, so when the wind blew (which was constant) the chemicals would be breathed by all. The half life of the pesticides half life was at least 6 weeks! I suffered severe asthma, bronchitis, high fevers, and pneumonia repeatedly. The best thing we could have done was to get away from that house of death! Now, I can only pray that the chemicals we were exposed to do NOT cause life altering changes on my three children. STOP THE DRIFT!!! CRACK DOWN ON PESTICIDES NOW!!! Sincerely, Caroline Hurley

Help, save us!

The American people want protection of our air, land, and water. Without adequate regulations, corporations will continue to pollute and kill in the name of profits. Volitization and other forms of drift are serious health and pollution factors and must be regulated.

The other day I bought a bag of clementines. It was a net bag and the label wasn't easily displayed. When I went to eat one a few hours later, it had a chemical smell, but I washed the fruit well and figured that the smell was on the skin. NO, I ate a few sections of the fruit and threw the bag away. The taste remained in my mouth no matter what else I ate and after mouthwash. I did look at the small label on the bag, and it said that a chemical beginning with an "M" was used. I'm 75 years old and I need protection from pesticides! STOP using them.

We'd (probably) think twice about poisoning the food supply of another nation, even an enemy nation. But we're complaisant about poisoning ourselves and our fellow citizens for the sake of corporate profit.

Please help control our environment from pesticides - too many Americans are suffering!

You should also investigate these volatilized pesticides can contaminate water, something that often happens with airborne substances. If they do contaminate water, that would spread their toxic effects far beyond the farms where they are initially applied.

Protect our children please.

Our son was harmed by pesticide drift as a child and this should never happen to other children.

There is also the garden ears who just strew the lawncare products by hand with no protection.

As an environmental educator with an M.S. in environmental health science, I understand the importance of this issue and I am in complete agreement with the Pesticide Action Network that volatilization drift poses risks, especially to children, that must be considered.

I wholeheartedly appreciate the commitment to public health & safety you apply in leading the EPA.

PLEASE...consider the risks which are so harmful.

Howard	Horowitz	10990	NY
Bibi	Prival	11226	NY
Deborah	Gorman	10706	NY

Volatization drift from California's Central Valley has been carried long distances eastward and became condensation nuclei that fell in raindrops and snowflakes into the lakes of Rocky Mountain National Park in Colorado. This has resulted in pesticide-laden trout (including surprisingly high residue levels) even though the pesticides had not been applied locally. So drift is a very real concern, and I urge the EPA to deal with it aggressively to protect us from such "invisible" but very real exposures,

Please protect our kids whether migrant workers neighbors please protect anyone else too These chemicals are damaging to cognitive functions of especially children but any adult alsoFor the consumers these pesticides are toxic also

Madeleine	Sinor	10013	NY
Sara	Victoria	10034	NY
Jane	Hayes	12580	NY

As a scientist I know the importance of pesticide drift. The EPA has had to fight the ignorance in politics. Yet I will support you in this as I had supported you in the past. We must fight for what is right.

Prove that people won't do anything for money. 41 years in advertising and pr.

At the least, there should be a reduced risk of harm to children -- or anyone -- from airborne, wind-drifting pesticides and herbicides. These chemicals, some of which are carcinogenic and neurotoxic in even tiny doses, are already far too pervasive in our environment, our food and our bodies. The EPA needs to do more to control the use and spread of these substances. For the profitable convenience and mass production efficiency of Big Agriculture, public health has been put at risk.

Something HAS to be done about this issue please!

Yet more poison in our lives. Help stop it

Soon 2,4 D will be sprayed on crops because roundup has created super weeds that no longer are affected by roundup. If you remember the Viet Nam war and agent orange this toxic chemical will soon be used which means anyone who lives near to the area being sprayed potentially will be effected by the drift. This needs to stop! Thank you for energetically pursuing this danger.

This insanity must stop for us and future generations . Have a heart . Thank you

As you know also, migrant worker children often are in the fields, and the exposure to pesticides through drift puts them at great risk. Children who work on farms, family farms or other types of employment on farms, are at risk. Child workers or not protected. This makes it even more important for the EPA to limit pesticides and pesticide drift.

As someone with chemical sensitivities, I beg you to take action to protect people, particularly children from this risk.

We must be doing everything we can to eliminate the many toxins/pesticides etc from our world for the children, future generations and to save the bees to say a few besides cutting health risks we already have do to the chemicals that have been and continue to be used as though they are safe!

Thanks!

My brother and I own 71 acre farm in Lincoln County, Oklahoma and we want you to act immediately to implement the Volatization Screening Tool and then follow up with those results. We depend upon your leadership, reliance upon scientific evidence, and real help to protect us against these environmental injuries, We expect you to help the citizens and not to simply protect the profits of the large chemical and agribusiness corporations. Thank you,

Sincerely, Peggy Malone

Please, EPA, take immediate action! And please inform the public about which pesticides are failing the 'drift test'!

				I live in a rural area on 40 acres,have a large organic garden and raise heritage hogs, nigerian milk goats, laying hens that are free range and eat rabbits. Farmers and ranchers all around me use herbicides. Please help With the drift.

Thanks for helping protect families and kids.

Stop harming our children and families please.

Please do the right thing and put children's health ahead of corporate profits. Michael Gregory

As a mother who experienced a wind-blown drift of lawn pesticide while helping her son do a paper route, I can understand the importance. Our faces were soaked with poison and we were far from where we could wash it off. Farm blown pesticides are a nightmare.

Please act on this. It is important.

				The dangers of drifting pesticide residue is nothing new to people who live and work in small California towns. My mother taught for years at a school that, whenever the wind blew (which was often), caused everyone to have side effects. Over time, my mother lost her ability to taste and smell--and I am sure it was because of the spraying of dangerous pesticides on and near her school.

				In the coast range of Oregon offsite movement of forestry use herbicides is often a problem, both at time of application via helicopter, and for a day or so after application. If the chemicals can be detected by the olfactory system, exposure of some degree is happening. This type of exposure is very common and may be responsible for much of the elevated herbicide levels seen in local children's urine as tested by Dana Barr for the Triangle Lake multiagency investigation. Volatilization happens after the application process has been done and microenvironmental conditions have changed, all regulatory people are no longer monitoring weather... and this exposure goes undetected and underappreciated for public health risk. This issue needs to be addressed.

It's unconscionable.
We are affected by volatilization of pesticides in the Coast Range from aerially applied poisons! Please find a way to stop this!!!

As a former Private and Commercial licensed pesticide applicator, I understand the dangers these chemicals pose to those who mix them, handle them store them and apply them as well as to those who suffer from their application nearby without notice or approval.

I saw first hand what was happening in western Lee County, AR during 2 extended visits almost 10 yrs ago. I don't know how farmers have been able to co-exist with such conditions for this long and it's time to do them the favor of leveling the playing field.

I support utterly the intent, premises, and object of the petition I am signing. But I disassociate myself from the diction, grammar, syntax, and style of the petition's text.

People shouldn't be allowed to poison other people. These chemicals have a skull and bones on the containers for a reason.

This drift also effects certified organic status. While the USDA has relaxed their organic requirements for the big food producers, it continues to persecute small family farms and this drift residue is just one of the things they use. Please help eliminate this obstacle. Thank you.

I was at a school in Mosier, in the ColumbiaGorge, ORwhere the mother of some of the pupils said they could see the white powder on the windowsills of the school when the local farmers sprayed their orchards! Please do the right thing for all, and protect human health, as well as the long term health of our ecosystem BEFORE profits for a few. All our food was grown without these chemicals just a few years back, they are absolutely NOT SUSTAINABLE IN THE LONG TERM. Vested interests are too powerful for the general public to overcome them individually, we look to our government for help, please rise to the plate and do what's morally and ecologically the best thing for ALL. Thank you.

My husband was severely poisoned from herbicide vapor on our neighbors forest land that had been sprayed some days before. He was on our own property and was down wind from the vapor. He became very ill that day and had serious liver damage that took years to recover. Many people may be ill from these vapors and not know why.

Right on!
Please help stop this

Volitization is a important consideration when considering exposure range or limits.

The use of 2,4-D was abolished because of drifting which seriously harmed people and adjacent crops. So it makes absolutely no sense to allow it to be used again when it didn't work last time. Farmers will spray when the weather is still but the chemicals evaporate into a vapour above the crop to sit and be blown away latter onto so other field. Utter madness to use toxic life threatening chemicals on food crops anyway.

The residual harmful action of chemicals alien to our soils is extensive and little understood. Eg, the mutagenic effects down the soil food web and flow on effects to the plants and animals to us. Then there is the air we breath and the water we drink.

What about to stop using all the dangerous or suspicious chemicals and start with organic agriculture worldwide? The agriculture occupy large amount of people - but they are not on the fields. They are in chemical factories to make pesticides, in petroleum refineries, in factories for making trucks and harvesters....Isn't it a little bit ridiculous? Please, bring back the agriculture it's meaning - to support human's life and health!! Let us stop using dangerous chemicals!!!

Using all these pesticides has got to stop.

E 'PROTECTION' A

We appreciate your efforts to resolve this harmful problem

The people matter more than Big Ag. Help us!

Considering the questionable safety of many pesticides it would be beneficial to cut down in unintentional exposure.

Please take these steps to prevent us all from the dangers of so many pesticides!

Finally we are realizing the fuller impact of pesticides - thank goodness.

--------	------	-------	----

Throughout the growing season, we are constantly exposed to drift from our neighbors yards. This spring, one friend lost 3 bee hives, and she and her dog were sickened after a neighbor had his lawn sprayed.

Please, we, the people, are being poisoned !!! I ask you to move swiftly and finalize the volatilization screening tool....follow through and take timely action on the results.....I fear it is to late for many of us....but we will be helping our grandchildren's survival. Thank you, Paulett Simunich

Dear Administrator McCarthy, We are pleased to see that EPA is finally taking steps to consider volatilization drift. This important source of pesticide exposure has been overlooked for too long in the agency's assessment of pesticide risk. Data from the Pesticide Action Network's Drift Catcher and state agency monitoring in several states clearly show that volatilization drift is affecting communities across the country. Many of the chemicals measured in on-the-ground tests are known to harm human health, and children are especially at risk. The fact that 68 pesticides failed the screening test underscores the importance of this evaluation. Many of these chemicals — including the insecticide chlorpyrifos and the herbicide atrazine — are in widespread use and have been clearly linked to a range of health harms. We urge EPA to finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results. Children and families in rural areas deserve no less. Sincerely,

As a USDA Organic Certified producer (Bear Butte Gardens) in South Dakota, we are very concerned about pesticide drift. We have a few neighbors who don't understand, or don't believe, or don't care about the consequences of pesticide drift. Please help us by providing the legal tools to solve this problem. Thank you!

My child's health is more important than ANY corporate concern. The health of my neighbor's children is more important than ANY corporate concern. The health of all South Dakota's children is more important than ANY corporate concern. The health of all children who live in and travel through the rural areas of this nation is more important than ANY corporate concern. The health of every single child in the United States is more important than ANY corporate concern. The health of every single child in Canada and Mexico and all the land areas affected by pesticide drift is more important than ANY corporate concern. The health and sustainability of the pollinator population is more important than ANY corporate concern. The health and sustainability of the planet's soil, flora, and fauna is more important than ANY corporate concern. Please finalize the volatilization screening tool and move with haste to take action to protect the human population, the pollinators that ensure our food supply, and the sustainability of Earth's rich biodiversity so that humankind may survive and thrive on a planet that is pristine and beautiful beyond compare. Thank you for your time. Thank you for acting on my behalf.

Don't roll over to these corporate polluters. House hold pesticides and herbicides are a real hazard too. Mosquito fog spray, weed killers, vapor mosquito repellents are all available to the public and are very toxic. People do not know any better and buy these items and poison themselves and their neighbors. These things drift for a long way.

Yvonne	Hansen	78745	TX

As a Public Health professional, I am deeply concerned that the EPA is failing to protect people, especially children and child-bearing age women, from all chemicals - but especially pesticides, which are dangerous in our food, as well as in the air and water.

As a senior citizen living in very close proximity to field crops, I have seen drift come right over my home and my organic garden. I would like to continue enjoying good health, but believe continued drift will make that difficult, at best.

There are too many pesticides being used!

I live next door to an agricultural field and the farmer sprays pesticides frequently. I often find dead beneficial insects in my vegetable garden and I cannot pursue my beekeeping hobby because they keep getting poisoned. I find them squirming and dying on the ground under the hive. I fear for what these pesticides are doing to my health and the health of my family. I grow my own vegetables to try to eat cleaner food but I can't even trust my own because of all of the chemicals the farmer sprays next door.

Please consider the ill effects drift has on neighboring properties. I'm certified organic for the past 25 years and not the State of Texas wants to put a major highway next to my farm. Vehicle emission will have dire consequences on my rainwater collection system and soil. Not to mention the herbicides that will volatize with vehicle emissions and cause even more harm.

Please do the right thing! Do right by today's children and future generations.

We must stop poisoning our world. The endless round of poison, resistant pest development. stronger poison repeat, is not an acceptable to produce food. It is a system designed to produce profit and sold as "the only way to produce enough food". That is false. We do not need to choose between food and health. We must see that people have both. Please stop big-ag from poisoning our land and making the families that live in farming areas sick.

The future of American agriculture and the planet depend on sensible and responsible decisions that may run counter to short term business interests. Please think of the future and think of our children and the world they will inherit. Please do the right thing. Many thanks.

Some of us are very sensitive to pesticides and that drift is terrible
It's not only for our kids, but the rest of us and the planet!!

We need restrictions on "drift" of pollen from genetically engineered crops as well. Our organic farmers need protection from airborne contamination. Pesticides and narcoleptic s are both toxic. It is so hypocritical for my taxpayer's money to be used to interfere with medical marijuana dispensaries.

Due to exposure to chemicals including pesticides, I have reached a level of health where even minute exposures to pesticides can impair my body's ability to function properly. These chemicals affect my ability to work. I strongly believe we need more and better control of pesticides if they continue to be used at all. Decreasing productivity of the work force seems to me to be not in the best interests of anyone, whether CEO or blue-collar work or anywhere in between.

Finally! Please protect all of us from this saturation of human made toxins in our ecology!

I live in an agricultural area and the crop dusters routinely spray under conditions that are not within normal limits. Their drift has killed many of the plants in my friends gardens. This is not safe at all.

Please do everything you can to measure/control drift of pesticides.....more information of the screening tool would be appreciated.

thank you for protecting our children.

				This situation is in urgent need of redress for two reasons: first, because it endangers the health of all who live within range of the drifting/redrifting chemicals, and second, because it has the potential to compromise the soil and crops of farmers who CHOOSE NOT TO USE pesticides. Organic farmers have the right to produce healthy, nontoxic food to provide to consumers who care about the purity of what they eat. TOO MUCH LATITUDE has been given to the agricultural industry to spread their poisons far and wide. THIS HAS TO STOP: STOP IT NOW!!!

We are DROWNING in chemicals. EPA can now predict which pesticides are likely to re-drift. DON'T WAIT ON THIS.
Help the entire earth to become healthy again by removing the chemical pesticides

Kevin	Darcy	98225	WA
Leah	Eister-Hargrave	98103	WA
Terry	Wilson	98512	WA

I've been suffering from volatilization drift from Roundup and 2-4,D for years. My neighborhood is awash in these two chemicals throughout the lawn care season and I really suffer--asthma attacks, migraines, and other neurological symptoms. These chemicals need to be banned, especially for cosmetic use.

Paula	Matheson	99223	WA
Greyling ronald	Gentry long	98052 98077	WA WA

US child cancer rates are highest near poisoned fields. Please save lives by screening for volitilization now!

Mike	regan	98339	WA
jennifer	johnston	98597	WA

"DRIFT" has been on my mind since I realized that those "toilet pills"- paradichlorobenzene- were going into my nose if I COULD SMELL THEM. That was about 24 years ago. When I can smell 'Something' in sprayed fields, whether it's one of the 'inert' ingredients or the principal poison, I'm being 'dosed' with something that I don't want. ^..^

Robert	Blumenthal	98115	WA

faye	nieuwendorp	98226	WA
Chris	Stay	98020	WA

The use of pesticides and chemical fertilizers is a 20th century practice that is not only outdated, it is harmful. It needs to stop and be replaced as the decline of honeybees, the presence of pesticides in mothers breast milk, the increase of Alzheimer's etc., the proven lowering of children's I.Q. , and the destruction of water due to algae growth from the nitrogen content of chemical fertilizers. In fact the list of harmful effects from pesticide use is epidemic and so lengthy as to boggle the mind. We need to clean up our collective acts and the manufacturers of these types of "products" need to RE-TOOL, RE-SCHOOL and stop perpetuating ECOCIDE which is beyond foolish. Cause and effect are NOT negotiable. The saturation of these carcinogens IS deadly, and the fact that Agent Orange is allowed to be used is CRIMINAL.

If our farmers were to adopt more healthy ways of growing our foods the plants would be able to fight the pests on their own. Until then, please help us mitigate the exposure to these toxic solutions.

Ever heard of twice baked potatoes . this twice applied poison !!!!!!!
I want to see bees back in my garden. There have been no bees in my area for going on 3 years. I know bees and dragonflies and butterflies are being killed by the poisons on the above list. Eliminate them now, EU already has.

Our friends have 2 children with birth defects. They used to live in the agricultural area around Yakima, WA.

Please do your job and stop allowing companies to poison us.

To be honest, I thought volatilization would have already been regulated. Protecting people from exposure to harmful chemicals can't just stop after application.

-----	---------	-------	----

As a career land grant university agricultural professor, I encourage you to give priority to this issue. Over the years I have dealt with volatilization problems with several chemicals. Better knowledge of chemical specific characteristics would be of great help to applicators, prescribers, and others and would help reduce concern about potential harm to people, crops, and the environment.

P.E.	Crawford	98648	WA
------	----------	-------	----

There are too many pesticides about which too little is known. But more and more information slowly comes out about the seriousness that these chemicals present to health.

-----	------	-------	----

I was sprayed by a neighbor a few years ago who was using Weedmaster 3 (he has a farm of sorts). He didn't mean to do it but he did not apologize. The wind was blowing the spray from below me up the hill to where I was gardening (organically, of course). I instantly got a headache and for the next several mornings I woke up with an acetic taste in my mouth. These people think they are helping the world by getting rid of the nasty weeds. They are unenlightened!

I want clean air & food. No drifting!

We are owed eternal vigilance against any fallout from any pesticides. The industry designing, manufacturing and distributing these "death bombs," is loathe to disclose anything derogatory about their products, and have long since proven that they are to be suspect and distrusted in ALL they do and say. This volatilization screening tool appears to be a good start toward complete disclosure and honesty and should be put to use STAT!!!

children....not big business.

Charlene	Lauzon	98036	WA
Darryl	Wilson	98072	WA
Erin	Potter	98595	WA

Please do not allow big business profits to interfere with the health of children. Will these corporations be willing to pay for these children's subsequent chronic and costly health care? Will these corporations be paying for remedial school intervention since neurological disease is more likely to occur in vulnerable young children? In addition, will these corporations paying for social and health services needed by these children and families? If you would not want your child or grandchild to be subjected to the same conditions as these children, then it is unconstitutional to expect these children to endure it. Fair and equal rights - the right to pursue life liberty and happiness.

We won't even get started about the toxic air quality affecting residential areas surrounding our commercial airports. The exhaust from airborne jet fuel emits particulates made of numerous dangerous chemicals. Research on the average life span of residents living or working close to airports would be intriguing. Your job is to protect the American people from these harmful chemicals. Please do your job!

hi

Having lived near farm fields most of my life, I have long been concerned about the pesticides & herbicides I can clearly smell from my house after spraying, even though I live blocks away. We must use our knowledge to protect our communities; looking the other way only makes matters worse.

Carrie	Schudda	53575	WI
Garrett	Walters	53589	WI

My health was severely compromised by pesticides. It is so hard to stay away from them, and each time I am near them, I get sick again. Please help us protect our health.

Janine	Melrose	53707	WI

Linda	Ball	53523	WI
Samuel	Morningstar	53211	WI

Please put more research into this matter.

As an organic farmer I know it is imperative that spray drift be stopped. I have had crop damage from drift for several years. Farmers using chemicals are not held accountable for the damages they cause. This is wrong.

Why do you continue to put people's lives and health at risk? Another example of corporations/big Ag having way too much power!

Judy	Jolin	54964	WI
------	-------	-------	----

Time to stop monitoring....we know it is dangerous...and do something to stop it. Why is it the people who are harmed have to go to great lengths to prove harm to protect themselves? Chemical companies can harm without any barriers until the rest of us go to great lengths to stop it. Isn't that partly what government is about - protecting the nation from harm.

...we must stop creating atmospheres that make our children so very sick.

Norm	Osterman	99362
CARMEN SAN	SADEK	90034-3406
Raymond	Jackson	94510

2-4D drifted into our 30 plot community garden in Walla Walla, WA and settled on part of our grapes, creating "witches broom" on leaves and misshapen grapes we can't eat.
 Â¡Â¡Â¡POR FAVOR!!! &
 Â¡Â¡Â¡MUCHAS GRACIAS!!!
 Act like a caring human being !!!
 Act now. Families need protection. Polluters need to develop better ways and stop injuring public health -- nearby people AND farmworkers.

Jo Ann	Duman	75503
--------	-------	-------

Dorothy Wake 95822-2438

Additionally, pesticides are now known to be the cause of bee eradication. It's plain & simple--we can't exist without bees to pollinate crops. Without bees, we will experience dire food shortages.

your ERA as You, Sir, effect positive change to LEAD the EPA to affect the requisite change that is killing our nation, toxic drift by drift.

A PSORIASIS epidemic sweeping through our American senior citizen (truly heartbreaking, I personally assure you) is now costing Our Own Sovereign and beloved, albeit, most certainly beleaguered Nation, the U.S.A., whom You, Sir, Do Assert and Affirm to Protect, reflects the newest offender, the sweetly softened term, "the effects of toxic drift." The truth is harsher: Decades of EPA sanctioned Pesticide, Herbicide, Chemical Fertilizer run-off, not to mention human waste from farm workers not permitted, have worked in my own family's farms--now all gone to toxicity of Agro-Business. Yes, Administrator McCarthy, all my life, six decades, four of which I have been "gravely disabled."

Dawn John Mulderig Kieffer 95502

Yes, I have labored, feet in slippery mud, back bent hands outstretched before me, ever seeking for that All citizens must be protected.

All possible measures should be taken to assure that we don't pollute our environment with harmful chemicals.

We rely on our environment for just about everything our society uses, and we don't understand the effects that pumping chemicals into the environment can realize. It is a huge risk to do so; we are gambling with the health of our planet.

Also, consider the un-wanted spread of genetically modified plants!

America

animals, too!

Anyone ever heard of COMPANION PLANTING?

Anyone who uses toxic chemicals should be responsible for unintended application, regardless where it may spread.

Are we THAT stupid?????

As a college professor teaching Environmental Injustice and a major leader on our college's theme year, Health and The Environment, I understand this danger and urge EPA action to protect rural communities

As a migrate Farm worker I experience the breathing, smelling the pesticide every day.a kid swim in the rainbo , colorful water. As a worker I worked in the cotton fields while the rancher would have planes spray the fields over us. We would bath in the creeks and washed our cloths in the pesticide water.

Elinor Graham 98118

Michael Treece MD

John Peter Ayala 91360

Nancy Kingston 92692

Tina Correa 92604

As a pediatrician, I am especially concerned about pesticide exposure to pregnant women and children. Thank you for developing this screening tool and I hope you are able to use it ASAP.

As a pediatrician, I am most concerned about the effects--many already well-documented--of pesticides on developing children.

As a previous farm laborer I have suffered the effects and now as a teacher, several schools continue to suffer due to the location of the school. Laguna Vista Elementary in Camarillo is surrounded by fields.

As a public health/health care professional for 35 years, I strongly urge you to take actions to prevent pesticide drift.

As an adult child of a farmer worker who worked applying pesticides to the fields, I worried about the effect pesticides will have on the health of our family. My father died of pancreatic cancer 10 years ago. His sister, who also worked in the fields, died of colon cancer this year. His oldest sister, also a farm worker, had uterine cancer at 50 years of age and is still suffering the side effects of the treatment that saved her life. I was diagnosed with an aggressive type of breast cancer 2 years ago. My mother who washed his clothes has been diagnosed with lupus. I hope that no one else is in our family has to suffer because of the long term effects of pesticides on our health.

Theresa	Lamb	94110	<p>As an RN, I can testify to the increased numbers of patients seen for upper respiratory issues, that more often lead to Chronic Lung Diseases. This is something you can help control, by advocating for the removal, reduction in pesticide usage. Do the right thing, for every person to breathe clean air. Thank you, Theresa Lamb</p> <p>As someone who has had their life colossally diminished as a result of pesticide drift, I fully support any and all legislation that will curtail this dangerous activity.</p>
Steven	Campbell	4769	
Diane	Kehoe	V4K 1R8	<p>As someone who lives on the edge of a large block of land in the Agricultural Land Reserve I have always taken a great interest in who was spraying 'what'. My acreage has been managed organically since 1976 and I have been pleased as more and more of my neighbours went organic. I no longer have to worry about planes spreading pesticides on days where the prevailing wind would carry it over my property. I want everyone's children to be able to play next to the fields safely!</p> <p>AT some point it would be nice to also include local pesticide spraying of houses - there is plenty of drift with that as well.</p>
Jacque	Thiele	35453	

			<p>Bees are dying all around us, and we have only seen two butterflies in our garden this year so far. We have an acre amidst many farmed (by others) acres of almonds and grapes, have lived here for 30+ years, and have watched the decline of insects, despite our all-organic plantings and care.</p>
Patricia	Silva	93662	<p>We use no pesticides and no herbicides on our acre. Our immediate neighbors have cut way back on those sprays in the recent past. But the damage from the area as a whole seems to exist anyway. Please don't continue with these chemicals!</p>
Jim	Mochuk		<p>Between GMO's & pesticide drift soon we won't need food. No one on earth to eat it. This truly is the slow destruction of our earth!!</p>
Debbie	Notkin	94609	<p>Childhood cancer is an absolutely miserable experience for the child and the family. Please do what you can to prevent this (and other health risks) for anyone who might be affected.</p>
Alvar	Palacios	60645	<p>Children and families are at risk here! Need anything else need be said??? Children, pets, pollinators, birds, all species, are at a terrible risk because of the unchecked use of pesticides. Pesticides will be proven to be a leading cause of sickness and death of all species. Absolutely REVOLTING that the EPA, USDA and all other organizations that should be protecting us from these toxins are not.</p>
Carolyn	Ricketts	21037	

Robert	Shorin	11791	<p>Cities and suburban areas are protected from pesticide drift by local legislation. Urban areas need your support and protection.</p> <p>Coming from an agricultural area, both my parents and I worked in the fields, I know this affects our health and safety and highly encourage this to be a priority.</p> <p>Common sense tells us of the danger of smoke even second hand smoking. I as you how much more danger are the chemicals breathed in by all.</p> <p>Please set human health as a priority when making your decisions.</p>
BRIZIA	MARTINEZ	95932	
Nora	Beauchamp	30087	<p>thank you,</p> <p>Nora Beauchamp</p> <p>contamination by pesticides and herbicides is a public health problem. They lead to a number of chronic health issues and result in death, genetic disorders, birth defects and shortended lifespan.</p>
Jerry	Matsui	98122	<p>Contrary to what some may believe, this is the only air we have to breathe, and this is the only atmosphere we as a species can survive in. Anything else isn't even an option! Please Help Us Continue to Exist! Thank You...</p>

Great thanks from informed citizens to wise administrators of public trust who will courageously stand strong to protect our world from soulless corporate Forces of Greed & their short-sighted operatives among the pathocracy. A healthy economy is dependent upon a healthy population in a healthy natural environment; complex civilization cannot be sustained by policies based on priorities that pretend the dependency is the other way 'round. Growing up in Eastern Oregon, I was a recipient of the caustic effects created by pesticides. They were sprayed onto the crops by air and on ground. I didn't realize how much was inhaled until I moved away to NW Oregon. Every time I go to Eastern Oregon I notice an increase in heart rate and a chemical taste on my lips. Watching as crop dusters fly over crops nearby, If I am at bbq or picnics..... I don't eat and warn others not to. Health and safety from dangerous pesticide toxins is an inherent GOD-given right, and so is a clean and healthy environment. HEALTHCARE REFORM = REMOVING TOXICITY FROM THE ENVIRONMENT! HELP!!

WE ALL INHALE THE SAME AIR PESTICIDES were so heavy in my Wife of Beloved Memory it caused Parkinson's !! Hope you get my drift, no more pesticides from air or anywhere. What one does today affects tomorrow what isn't done today affects tomorrow. Thanks

evan	white	92106	How about putting victims before the corporations, as your charter dictates. Europe is far ahead of us in this regard, and they are far from perfect. How about you live in these areas for a couple of months to verify the toxicity of these pesticides? that's bound to make you a true believer! Human and environmental health is sacred. Do no harm. Human dignity must come first. Human health and safety are more important than capitalist corporation's profits! Humans are destroying the planet with pesticides, raising of thousands of cattle and sheep causing more greenhouse gases, polluting our oceans, and the list goes on. STOP the use of cancerous pesticides. I also think that residential neighborhoods are in the mix--the one person who sprays for mosquitoes (and unintentionally every other living thing, incl. his children) is someone we need to reach.
Rosa	Martinez Guidos	94806	Thanks
Etta	Albright	16630-1312	I am dying of IPF. They don't know what causes this disease but it may well be chemicals in our air, food, water.
Elizabeth	Solis	32829	I am in Canada but your pesticides drift into our country as well.
John and Mart Stoltenberg		53020-1828	I am one that has been impacted by Pesticides being sprayed on Apple Orchards near my daughter's school. I am signing on behalf of our 12 family voters and 4 children who all urge you to protect us.
Nina	Council	97520	
Mary	Rivkin	20814	
Marion	Golden	4102	
Priscilla	Laybolt	B2V2W4	
Susan	Bahl	94928	
Suzanne	Ferroggiaro and Family	95945	

Kyle	Bracken	90066	I don't even buy produce that was grown with pesticides much less want it to drift into my home, school, or other outdoor or indoor area.
Betty	Harris	80120	I don't use any pesticides on my property... I hate to think that I'll get it from my neighbors...
Jeffrey	Panciera	98118	I don't want my country to become like areas in China, where all insect and bird life has been eliminated due to overuse and careless use of pesticides. Pollination of crops there is done BY HAND. We would have to be moronic to destroy the bees that pollinate our crops for free!
Mary	Isaak	94503	I greatly appreciate living in a country that has an EPA and I thank you for all that you do to protect our health. I ask that you join in this great effort to support organic farming for the sake of our health and that of the planet. I grew up in a farm town and can see the consequences of these pesticides in my school mates and our relatives. It's unconscionable that the poor and often ethnic people of this nation are being unwittingly and thus unwillingly used as human lab rats for testing of agricultural chemicals.
Desiree	Michaels	98101	I grew up in a rural area where "crop dusters" and chemical spraying were a normal scene. Unfortunately my siblings and I also grew up with chemical sensitivity and allergies. As an adult I am still dealing with my toxic childhood. This has been going on long enough-the time to take action is now.
Suzanne	Guerra	95524	

			<p>I grew up in the Central Valley watching crop dusters and working in farms through my teens. I guarantee you that pesticide drift is real. I know farmers who died of cancer, who once acted blasÃ© about their pesticide use. Yes, there is a lot of money in industrial farming. But the quality has declined while the toxicity has gone up.</p> <p>Please act boldly because Congress cannot act at all. Thanks</p>
Todd	Darling		<p>I grow all mt own vegetables in my backyard organically. I don't want to have to worry about what my neighbors are spraying on their lawns.</p>
Candace	Krepel	53207	<p>I hasten to add that this drift also can result in chemical</p>
Keith	Olcott	1754	<p>Trespass on farms and gardens in the area, resulting in economic loss.</p>
			<p>I have been caught in pesticide drift several times. I don't wish that on anyone. Many workers face this hazard every day.</p>
Richard	Creswell	80227	<p>I have drift issues from the farmer accross the road drifting into my organic garden and flower beds - this is absurd that we try to protect ourselves and are unable because of what OTHERS are allowed to do - no to mention the effect on bees and butterflies and wildlife around me which i provide a habitat for - thank you for protecting us</p>
Mary	Mikesell	46060	<p>I have personally been poisoned by pesticides and it has ruined my life!</p>
Kendra	Hunter	96708	<p>I have read this petition and agree with what it says. Please help protect workers.</p>
Janet	Larson	95469	

Greg	Buchler	90713	<p>I hope that you listen to the voices of the less fortunate who are the ones most likely to be harmed by these pesticides. The wealthy chemical companies and corporate farmers already have more than their fair share of power in this arena.</p> <p>I live and work in California's Central Valley, and I can personally attest to the negative effects of pesticide drift in all forms. Action to mitigate the irresponsible use of pesticides ought to have been taken years ago. Please act now!</p>
Victor	Estrada	93304	<p>Victor Estrada</p> <p>I live close to a rice growing region. Frequently we see planes crop dusting the fields. How much of the spray will drift, even after it settles? The area is windy and the wind blows across the fields right into our backyard and into a grammar school. What are we breathing? I thank the EPA for looking into this matter.</p>
Maggie	Hottle	95747	<p>I live in a farm community. I want to know if I am being exposed to dangerous chemicals.</p>
annie	capestany	99362	<p>I live in a great community, Davis, CA that is surrounded by fields, as is Sacramento, the Capitol of California. We feed the nation. Please protect us!</p>
Merry	Draffan	95618	<p>I live in a large farming community, this is important information to all of us here.</p>
Amanda	Monteiro	95076	<p>I live in a rural farming area, and so I</p>
Gregory	Harbert	95076	<p>do know what a problem this is.</p>

Barbara	Holcomb	49221-9700	<p>I live in a very small village in rural SE Mich.. We have a large number of cancer patients here. My husband died in 2011 of very aggressive advanced Parkinson's, with no family history. We are surrounded by fields and we all use well water. Almost weekly we can see farmers spraying next to our homes. The bees and butterflies are gone too.</p> <p>I live next to fields where strawberries and row crops are grown and see the poison signs in the fields on a regular basis. Children wait for the school bus right next to these fields and we all live close enough that we are exposed to spray drift. Protect us please.</p>
Delinda	Robinson	95004	
Johannah	Hupp-Clark	43022	<p>I live very near several fields that are crop dusted by plane. We try to stay in doors while that's going on, but we can't stay inside forever and the idea that we might be breathing in those chemicals long after the dusting itself has stopped is very alarming.</p> <p>I live where incompetent farmers spray in all weather conditions. My daughter and I were actually sprayed one year while in our [until then] organic garden. We both suffer from health issues as a result. They constantly spray round up and pesticides where they drift on my property, crops and horses.</p>
Jean	Taylor	44662-8734	<p>I live with my family in Oxnard, CA, in Ventura county, where twelve schools have been identified as having pesticide pollution problems as a result of close proximity to the fields, thank you for working to protect my children and thousands more</p>
Tara	Yosso	93030	

Nicole	Hermann	94803	<p>I live within miles of Chevron, which is scary enough of an environmental risk. I want the amount of potential environmental risk in my geographical region to be minimized. Please support me in this plan.</p> <p>I lived in the middle of orchard land when I was pregnant. My twins both have autism, as does the other child who was born in the neighborhood around the same time. I will always wonder if environmental exposure to pesticides contributed to the condition that gives them their unique challenges that will be with them and our society for life. Please take action to protect our communities from pesticides.</p>
Rachael	Pashkowski	98801	<p>I lost my Dad in 1991. Medical insurance is important. Plus communicaiton. God bless.</p>
Vincent	Ramirez	93304	<p>I own an organic small farm, I have seen first hand what over spray and drift can do to planted crops.</p>
Allen	Rapatz		<p>I personally witnessed the effects of sprays on Costa Rican workers-- health issues for them and their families, such as infertility and birth defects.</p>
Linda	Brebner		<p>Such realities are unacceptable in Costa Rica or the U.S.</p> <p>i refuse to pay the price for organic because of pesticide drift.</p> <p>it's back to nature and minimize (or eliminate) pesticide whenever possible.</p>
mac	mc cabe	i	<p>I remember as a child becoming ill after a cropduster plane was working in the neighboring fields; it affected my health and my mother's for a long time. Please do not let this happen again to anyone else.</p>
Kit	Mason	20902	

Jan Linda	Dietrick Wittle	93001-1116	<p>I run a company providing biological pest control methods for agriculture. There are safe and effective solutions; there is no need to poison people to grow crops. I strongly agree with this!</p>
Jane	Hey	51104	<p>I studied DDT uptake by various organs of animals and realize that other pesticides are equally dangerous. Some folks would like to combine more pesticides to combat resistant bugs. Please strengthen the rules for pesticide use and deny the sale and use of toxic pesticides. We have to take better care of our planet</p>
Erica	Garcia	95035	<p>I suggest we "Erin Brockovich" the situation. Locate all those people who claim that there is no drift, there is drift but doesn't get to people, and/or what does touch the people is harmless....have them gather their own young children, grandchildren, nieces and nephews and have them exposed to these same contaminants for the same amount of time as rural families are exposed. They will sing a different tune when it's their own loved ones. It's about money for them, and they won't act unless they are directly affected.</p>
Ms. Bert	Saavedra	91706	<p>I support the actions of EPA regarding pesticides. Save our generations of over use of chemicals that kill or endanger the earth's population.</p>
Marc	Grossman	95818	<p>I support the United Farm Workers in this important matter.</p>
Kenneth	Hundzinski	90293	<p>I want to be protected against all effects of pesticides and I want to know everything I need to know to protect myself.</p>

betty murphy 90802-5059

I want to know when the
PEOPLE..THE CITIZENS are going to be
important....their health..their very
lives.....WHEN???

Ms.Marion Gregg-Whited 7666

I was diagnose with cancer. I believe
all the GMO's and pesticides are the
problem. I had no health issues until
2005. How are we going to keep our
children healthy if we continue down
this path. Please think about this
issue carefully. Thank you.

Diana Duncan 90403

I was one of these children affected
by Pesticide Drift and as an adult I
suffer from 6 autoimmune diseases.
Please take action to prevent this
from happening to other children
I will be 61 years old in September
next . I started working in the fields in
1964 4 months before my 12th
birthday. I worked because it was
necessary to my family. I remember
picking Blue Hubbard and summer
squash while a tractor pulled a tank
spraying in the same fields . The smell
was unique, on some days when the
winds were up we would be damped
by the chemicals. I feel the effect of
that and other exposures today.
Common sense should dictate that
any use of any chemicals within
proximity of any persons should be
halted. That the content of these
pesticides be carefully examined,
people have to considered in this
debate.

James Thompson 89143

I will never forget the image in the
newspaper of a mother field worker
feeding her baby a bottle in the field,
taking a moment away from picking
to nurture her baby. Pesticides! You
bet!

Shirley & Bill McGrath

Jamaka	Petzak		<p>I won't allow pesticides on my property. I don't want pesticide drift affecting us. Please adopt this plan immediately. Thank you.</p> <p>I work with children of which the majority of them work in the fields or nearby and are exposed to this on a regular basis.</p> <p>If it would not be legal to use in war (See treaties on poison gas.) why is it legal to use on us?</p>
Norma	Hernandez	48076	
William	Page	90066	<p>Bill Page</p> <p>If you note how many children have diseases like asthma, you will note what pesticides are doing to our environment. I am 76, and have been dealing with hives for years, largely because of pesticides. This HAS to stop!</p> <p>I'm a person of faith. Thank you for your on-going efforts to care for and protect our beautiful home planet! Improve regulation over the use of pesticides to protect nature and human well being.</p> <p>In 2000 I was diagnosed and treated for non-Hodgkin's lymphoma which I believe was caused by crop dusting in my youth and pesticide drift in the last 20 years. During both periods I lived in home and then a town surrounded by farms which utilized pesticides aggressively.</p>
eunice	eckerly	55454	
Allis	Druffel	91104	
Federico	Lopez-Flores	52925	
Lisa	Adolf	98204	<p>I've been in remission for 14 years, thank heaven due to early diagnosis. Not everyone is so lucky.</p> <p>In addition to killing the 'bad' insects, pesticides are killing the many beneficial insects, especially bees.</p> <p>Please stop the killing.</p>
Ann	Cantrell	90808	

In addition to people living and working in the path of pesticide drift are motorists driving through fields with their car windows down. On the freeways going north and south through California's Central Valley I have seen many cars with windows down while in the fields are tractors or planes spraying. Later, there may still be drift.

Thank you for doing whatever can be done to address this big health problem.

In an era when people are concerned about secondhand cigarette smoke, it's unconscionable and immoral to allow profit-driven agribusiness to imperil lives and health by poisoning the air we breathe!

In many ways these days Americans are being attacked by chemicals not intended for them. Americans should be protected from uncaring corporations or industries, not poisoned by them.

Please ensure that this does not continue to happen.

Industry and the chemical industry are out to kill us swiftly or slowly. What's the difference as long as it brings in MONEY!!

Isn't the health of citizens enough of an incentive to move quickly with implementation of assessments????

It breaks my heart that we're still talking about the dangers of pesticides, and how it affects so many of our internal systems.

Alice Newton

Linda Morey 55114

Lee Bartell

Elizabeth	Triano	12563	It is increasingly disturbing and destructive that America is often behind our global peers when it comes to regulating industrial chemicals in instances such as these. It is so important to protect the health of the hard-working laborers who put food on our tables. Please implement the screening tools that can better protect them from the devastating affects of pesticides. Many thanks for your attention to my plea.
Julie	Heath Elliott	90064	It makes no sense to kill off other sources of food and to pollute our soil and water so the foods that are being grown with the use of pesticides make us sick.
John	Walker	48105	It seems these chemicals that were supposed to help us are now hurting us.
GRACE	NEFF	97322	It should be a no-brainer to correct this fault of drifting chemicals for everyone's safe health.
Lorraine	Stark		It was chilling to learn that pesticides were mostly responsible for the loss of both wild and cultivated bee colonies. Also, contamination from Central California's farms were the culprit in destroying frogs in the Sierras. Given the long distances these toxins travel, we are concerned that bees and people are the most important victims of existing, widespread and increasing toxic pesticide use. Please
Landry	Wildwind	94530-3317	

James	McAndrew	94122	<p>It was disturbingly interesting to hear a few years back of T.V personality, Bill Moyers having blood tests which revealed the presence of somewhere around 70 pesticides in his blood stream. A number of these [such as DDT] haven't been used in the U.S for decades. Clearly, these compounds don't break down in our bodies. It would be better to not use pesticides at all. It's great that the EPA is finally doing something about redrifting, but pesticides are still poisoning the crops we eat. The campesinos are the most to suffer since they are around these poisons everyday.</p> <p>It's criminal to pollute the air with pesticides that cause severe health problems.for "" Æ±APTIVE "" populations</p> <p>It's important to stop the drift of these pesticides as they hurt wildlife as we as humans.</p>

It's time to take a stand against the continued victimization of the very farm workers and their children we all depend upon for our fresh vegetables and fruits as well as their non-farm neighbors. Thank you for highlighting the increasing risks of pesticide exposure and volatilization drift.

ITS TIME TO TAKE ACTION

It's time to take care of people - as opposed to corporations!!!!!!!!!!!!!!

I've been under clouds of these chemicals and it's scary, foul and must be dangerous. Stop this madness.

Just got home, drove into the apartment complex and hit with a nice big blast of chemical scent in the air, so important to have no weeds or dandelions or anything else alive on the ground! hoping to move out soon, try to get somewhere less chemical led

Just want to see families in farm communities kept safe.

Just want to see families in farm communities kept safe.

Keep up the good work!

Keep Us SAFE from Pesticides - NOW!!!

Killing your own people for the bottom line

Leaders of America, pls. start doing your job that our taxes are paying you to do. Protect us from the evil corporations! Thank you!

Legislation is long overdue to sue the pants off the pesticide industry. It's long overdue that the EPA live up to its responsibilities.

Let's do something about this problem as soon as possible...the sooner the better!!

Lets get Big Ag out of the picture, take care of our citizens health. Let's look at corporations who give millions to cancer hospitals but own the corporations that that cause CANCER and get them to stop! Let's protect our Raza. Let's SAVE Mother Earth and ALL LIFE in our PLANET.

Let's stop this spread of toxic environment ruining people's health. Let's take advantage of these new measuring tools and do what is right for people living in rural areas. They deserve the same protections as those in urban settings.

Living as I do on a portion of our family's original farm and subject to no-till properties around us, I am concerned for ourselves, our families and our neighbors.

Ma'am,

My family lives on farms and in rural towns. I have to tell you that each time I see a crop sprayer flying over: I flinch. How long will the poison be in the air? Until I read this post from the UFW, I had no idea that these poisons would drift again! I thought once was more than enough.

Please, Ma'am, help us by using this new measuring tool and then use the results to help make our rural areas a safer place to live.

Thank you,
Shala Carter

Carolyn	Radcliff	95841-2656	<p>More and more people are showing up with harmful pesticides in their blood, such as RoundUp, which has been linked with infertility. As to why this dangerous pesticide is allowed and even expanded for use is beyond me. It's time to reign in this insanity! My brother lives next to a farm in Newbury, MA.</p> <p>They spray their crops every day. One crop one day, another crop another day. He has a chronic cough he never had before. When the wind is blowing and they are spraying you can see the spray being pushed through the air past the intended crop. It is very dangerous.</p>
Peg	Herlihy		<p>My colleague and I have spent years studying the neurophysiological and neuropsychological effects of pesticides in the farming community and have seen significant associations in neurological function and mood disorders. These published studies were in adult samples. These associations are probably much more serious for the developing fetus and children. Please do something!</p>

Neurodegenerative diseases, autism, alzhiemer's, dementia, Parkinson's, ALS, and more can be caused by pesticides. Nature evolved all these years to support greater diversity and complexity of Life. We need to return to our awe and respect for the laws of nature and respect our place within this diverse system. If we support organic and sustainable farming, we respect the needs of all Life. If we are not careful, our arrogance and greed is going to destroy our species. Please support the needs of Life o er the greed of corporations.

No one should have to be exposed to poison while working.

No pesticides
...is...

Good pesticides.

NO PESTICIDES!

No pesticides! We want HEALTHY food!

No to Monsanto!

None of us want to be poisoned. We all want to live healthy lives!

Now, I also learned that since pesticides kill insects that birds feed from, birds are disappearing as well.

When are we going to stop poisoning our environment and ourselves!

Dorothy	Schultz	85335-8231
Olivia	Rios	

On a personal note, I have upper respiratory allergies and problems which have been worse. I lost a dog at eight years old to valley fever. Here in central Arizona Phoenix area we know all too well the dangers of dust everyday. Unfortunately, many of the farms use pesticides. I have no bees in my garden this year and I just learned that the plants I have bought from Lowes are treated with chemicals that kill bees. What is next famine from no crops due to no bees and drought (global warming is real). On behalf of my 50 scholars from a tiny farm working town in the salinas valley.

One year I became ill driving through farmlands in Ventura County and another time I became hospitalized driving through farmlands near Fresno. I can't imagine how sick farm workers and their children must get while working around toxic soil and toxic air from pesticides and herbicides. I'm asking that you help them now.

Our world has gone crazy with toxins and poisons heaped on our families and friends. We are getting sicker and having a less responsive medical staff to deal with the effects of these toxins. Please, stop the use of so many harmful chemicals which are effecting our families and children. So many are untested or limited testing and are putting more at risk. Use standards that keep people safe and not at risk. Thanks
Overkill.

Part of my job for CRLAF is to do Field Monitoring/Investigations.... In doing my job I have personally witnessed & experienced pesticide drift & "other" pesticide drift damage to farm workers & myself.

Part of my job for CRLAF is to do Field Monitoring/Investigations.... In doing my job I have personally witnessed & experienced pesticide drift & "other" pesticide drift damage to farm workers & myself.

People over profits, please.

People, animals, and the environment over profits!

Pesticide drift is dangerous and harmful. Stop and listen.

Pesticide drift affects many people in rural areas, and it is time to do something about it. We don't want to be America the Poisonous.

pesticide drift and use is a major problem in this country-not just in agricultural land but everywhere in rural America

Pesticide drift: more good data needed!!

Rebecca	Casstevens	13905	<p>PESTICIDE EXPOSURE OF FARMWORKERS IS A LONGTIME TRAVESTY OF BASIC HUMAN JUSTICE. Pesticide use have gotten out of control it is time to do something! Pesticides are enormously dangerous and can even cause death. Using them is dangerous enough, and having their toxicity spread around is unconscionable. Pesticides are harmful. Pesticides are killing Bees, which we need for food and killing our children. Stop with all the pesticides. Really get your act together. PESTICIDES ARE POISONS---THEY ARE USED TOO MUCH!!! Pesticides are toxic. We should be moving toward organics and healing the soil which is supposed to be a living organism. Pesticides harm not only pests (that would be OK) but also - people - us!!!! Please do all you can to protect people from pesticides!</p> <p>Pesticides need to be strictly regulated to protect the health of farm workers and consumers.</p> <p>Prevention of illnesses caused by pesticides should be the number reason for strict regulations and fines. Pesticides also lose effectiveness and better ways to dal with agricultural pest should be found.</p> <p>Plain and simple, lets protect our families, and our future. It only makes sense, thank you for your time.</p>

Please protect these and all families.
No living being should be exposed to
harmful chemicals.

Please protect us all from these
chemicals.

Please put this into place!

Please put this into place!

Please regulate volatilization of
pesticides. It is appalling that the
movement of pesticides as a gas is
today not considered drift and is
exempted by EPA. As you know,
pesticides volatilize and move where
they're not welcome. We detected
pesticides on our crops monthly over
a 2 year period, were prohibited from
selling 120 acres of crops because
prohibited materials were detected
that were the result of volatilization
from other growers and had no
recourse through our local
agricultural commissioner who
carefully explained that there was no
indication of pesticide drift. Clearly
this regulation needs to be changed.

Please Stop using these life killing pesticides. There is no need for them, as there are many natural, life giving alternatives. The families living near the crops should not have to be at risk in any way, as well as any other form of life.

The new motto for our planet is "Do No Harm". Try it!

In Sincerity,

Ron Smith

Please!

please, stop with pesticides!

Pls protect workers, community from pesticide use!!

Poison is poison. We don't need the extra cancer causing crap on our food and blowing in the wind into our homes.

Poisoning people and the environment should be illegal. If an average person poisoned someone they would go to jail.

Poisons do not stop poisoning after they have killed the life you wanted dead. They continue to do their job until they finally dissipate. Poison sprays on road sides also spread with volatilization. And we have found in our community that they cause health issues from people walking by and to the people that live where the road is being sprayed. There are other ways to help deal with what we use poison sprays for. WE know there are, and they need to be used. Poisons kill LIFE.... Good grief!!!!

PROTECT AND ENHANCE THE LIVES
AND WELFARE OF OUR FARM
WORKERS AND THEIR FAMILIES !!!!!!!
protect the children. john dougherty

Thank you for creating this tool and
for using it. It has been too long in
coming. I lost my home and my life
because of spray drift, 13 years ago.
Thank you for listening! And taking
action on this! The record s show that
this is very, very important to the
health of all. Mahalo nui for doing
your job!

Thank you for listening! And taking
action on this! The record s show that
this is very, very important to the
health of all. Mahalo nui for doing
your job!

Thank you for looking out for my
friends out picking fruits and veggies
and their children and grandchildren.
I -- and they -- appreciate it!

Thank you for the changes you're
trying to make, Ms. McCarthy.
Millions of us are in your corner, fed
up with poisoned for profit.

Thank you for your time in
considering our letters.

Thank you in advance for your
attention to this important issue.
Thank you!

Thank you.

Thanks for doing the right thing. All
children are grateful.

Thanks for working on this for the
common good!

Thanks for your attention to this.

Katherine	Vigil-McClanahan	95627	Thanks for your work on this issue. We are raising a child in the country, and appreciate the EPA's efforts to monitor and curtail pesticide drift. The archaic Toxic Substances Control Act needs immediate reform to protect, not only poorly paid migrant workers, but everyone exposed to the 80,000 man made chemicals in use today. America cannot afford the illnesses and cost of toxic chemicals. Your job at the EPA is to PROTECT people from corporate malfeasance. Do your job or quit.
dennis	therry	95524	The connection between Parkinsons Disease and insect/herbicides is established. EVERYONE must have protection.
HM	Plourde		The dangers to families, and pregnant women who live and work near fields sprayed by pesticides has been clearly documented. The time is long overdue to address this problem!
David	Balsam	94618	Please act now!
			The deadly application of poisonous pesticides has been known for decades by those who apply them and those who have to work or live in the sprayed areas. These poisons are deadly to all living beings so where does the moral responsibility lie with their application. Shameful!
Ken and Donn. Bubb		89052	The EPA should play a strong role in protecting people from pesticide drift. Many people's lives depend on it. Please do your part.
don	cannon	91601	

Karen	Cappa	94928	The EPA was set up to protect the environment and now that Dow and Monsanto and other big chemical companies are rulling our country the pesticide useage has risen instead of fallen. It is critical for the EPA to step up and STOP the increasing pestiide use so that people, pollinators and animals can be protected. Once our water and food have so many pesticides in them that we all get cancer will just be too late, even for the chemical companies.
Pamela	Steen	34208	The families who pick our crops are in huge danger. The food supply as we know it depends on bees. Drift leads to nest weakening and death, in all likelihood. NO DRIFT.
Bettye	Case		The harm this does to children far outweighs the profit motive.
Patricia	Chang	46260-2860	The irresponsiblity needs to stop now...
Teresa	Zollars		The letter may be written by another, but it covers what I want to see happen.
Marilyn	Ciucci	60172	The more we learn about epigenetic changes down through generations, the more important this becomes for the health and safety of all of us, regardless of where we live.
Karen	Martin	93063	

Sally	Casas	95037
Priscilla	Judd	VOE 2G5
Gabrielle	Miller	94602
James	Pilewski	44095
Janice	Holkup	
Judy	Sylvester	41143
Ron	Hale	87502

The only way to cure cancer is to stop polluting and contaminating the air we all breath and the water we all drink. Each generation of children will suffer more and more by the effects of the chemicals greedy corporations dump into the environment and on our food supply. Critical thinking and making responsible choices is much more intelligent than making the fast buck. Peace, love & harmony,Sally

The only way to protect children is to keep the pesticide away from them. So please do this and what ever else it takes to identify and STOP spray drift. I am a survivor of pesticide drift. No one should be poisoned with or without their consent. Thank you for reading this

The rich are getting richer, and the workers are getting sicker! The science is irrefutable. Please! The health of thousands hang in the balance.

The second syllable of pesticide is cide=death. We are part of the ecosystem so pesticides also equal death for humans.

We are poisoning the earth of which we are a part on which we live and depend

The use of pesticides adversely effects entire communities of people and animals.

The widespread use of pesticides is poisoning the shared breathing space of the once-beautiful Central Valley in California--it's ironic that the place that feeds much of the country is now a dangerous place in which to live and work.

Renee Weinberg 51104

There are so many people I know who are getting or have Parkinson's from pesticide spraying. Monarch butterflies are dying. . . children are sick. Please continue to take steps to stop this. We - I live in Iowa and most of my family lives in Minnesota- deserve protection.

Sandra Cole 98684

There are so many ways the environment we have created can damage our lives, yet our government seems determined to protect profit rather than people. The costs of this protection far outweigh the profit. Unless of course you don't care about people or your own future.

Nicole Balant 4553

There is so little awareness about this problem, Children especially need to be protected.

Vicki Temple 16407

There needs to be a complete halt of in the use of all these chemical pesticides until a in-depth study has been done to protect our young from further harm.

Susan	Spivack	12043
Polly	Tarpley	98370
MaryJane	Welch	4841
Holly Margaret	Ward Herbelin	92103
Margaret	Herbelin	
Jon	Stewart	1938

There's more and more evidence that the latest generations of pesticides are not just killing the targeted creatures and then harming farm workers and nearby people in the communities surrounding the farm fields. They are also seriously reducing bird populations, and killing bees at such an alarming rate that all of agriculture is being affected. These poisons allow big profit for agribusiness owners now while guaranteeing a bleak and deadly future for all living things not too far down the road--including the descendents of the agribusiness owners--we are ALL ONE PEOPLE, AND WE ARE THE CHILDREN OF THIS ONE PLANET--THE ONLY HOME WE'VE GOT. Please stop harming our mother.

These are our children; they are our future, and we must protect them in all ways possible!! Shame on all involved in this perfidy, especially Monsanto!! Stop the spraying, stop the drift, stop threatening our children's health and lives!!!!

These pesticides cause more harm than good. Please support human health!!

These pesticides have to be determined illegal. Didn't Rachel; Carson prove that in 1962?

These tre

These treatments are damaging our pollinators, the essential element keeping our ecosystem functioning. Think of "second-hand" smoke... but much more far-reaching and deadly.

Ruth Seeliger 77025

This is a good step, but it's only common sense to realize that sprays are going to drift. Why has it taken this long to take action?

This is a major situation which requires urgent attention and handling - pesticides are poisoning (and killing) millions of Americans. Much scientific study is available on this issue. Best reference is the book Clear Body, Clear Mink by L. Ron Hubbard.

FRANCISCO sanz polo 90027

This is a matter of great urgency.....our health depends upon taking action in this matter.

Joanne O'Connor

Thank you for your attention to this.

This is a particularly important issue for me as I commute about one hour each way through almond and walnut orchards and rice fields. I have stopped counting how many times my car has been sprayed with pesticides and herbicides. I work in education, and I will soon be leaving my work in rural California because of my repeated exposure to the sprays from airplanes, helicopters, large sprayers, and even the lone man in a hazmat suit spraying along the highways. Weekly I will see people exposed to the drift because where one field stops another starts and one may be spraying and another full of workers tending to a crop. I have seen helicopters spraying less than a quarter mile from kids waiting for the bus to go to school in the morning. And there is drift--there is almost always drift. Highway 45 north of Colusa is often white with spray.

David Martinez

It is time to change this,

Laurie	Brandt	2144	<p>This is a public health concern. This is a really important issue and I hope you take action quickly! This is an outrage! This is beyond disgusting.!! UNCONSCIONABLE TO ALLOW IT TO STAND! This is critical. Our environment, people, wildlife and insects are exposed to toxic pesticides for the sake of corporate farming. This is long overdue! This is of crucial importance and needs immediate and rigorous examination. Drift not only affects humans, but also other animals (such as bees) and plants!</p>
Laura Martin	Liben Horwitz	10024 94122

Heidi	Dobson	99362	
			<p>This is our air, our oxygen. Why has our country always favored corporations and profit over our health? Our very basic rights to breathe without harm are jeopardized daily by random spraying of toxic substances that cause more harm to agriculture, food, water and air - and for what ? for chemical corporation CEOS to make more money at others expenses. They have ENOUGH. Our government - you - are supposed to PROTECT US. Please STEP IT UP. We are suffering here.</p>
D.	Singer	94607	<p>This is very late in coming but it is urgently needed legislation. This needs to be acted upon now! This situation is extremely serious. Action needs to be taken NOW. Threats to citizens' health which can be prevented are threats to our nation. Prevention is cheaper than treatment. Save our country money and protect our health by finalizing this tool as soon as possible.</p>
Carole Jo	Erickson Niemann		
Diane	Notti	95425	
Ellen	Franzen	94710	

Paul	Steffen	46542	Thumb your noses at congress and do what it right for the people.
Marian	Krewson		Time is of the essence--do all possible to eradicate this health risk, for the sake of all of us.
Nancy	Mueller	27516	Time to move may already be too late.
			To me in this day & age, it seems ludicrous to spray know chemicals and toxins on our food, etc!! Since we know they cause cancers, heart disease and respiratory illnesses, why do we continue?? There are alternatives in nature that keep insects and other "pest"" away, we should use them! More & more people want organic, natural products anyway!
Lisa	Scharin	29485-7706	To this day I can still remember the smell of pesticides drifting over the orchards in the town where grew up. I smelled it during the day at school and at home at night. I have purchased produce that I've had to throw away because I couldn't get rid of the pesticide smell on it in spite of repeated washings.
Lynn	Merrill	86005	Toxic drift must be eliminated
Gail	Camhi	94949	NOW~!!!

Two years ago our neighboring farmer sprayed his hayfields with 2,4-D to kill weeds. Our entire neighborhood was filled with drift for weeks! Although we vacated our house for four days, kept the windows closed for three weeks, my lungs were affected and I was ill for three months. Without a doubt my organic vegetable garden was contaminated, and I suspect that traces of the herbicide remain in my house. I received no help from any state or local agency including the EPA despite numerous phone calls.

Susan Flores 1070

Susan Flores 1070

Susan Flores

Unconscionable that in this age, pesticides are still used on our food that was designed to nourish and strengthen our bodies - not harm them. Shame on you! Educate yourself on the harm done to humans rather than on the bottom line. Use only organic sprays!

Olivia Hemming 95821
Jim CORRIERE 92227

Vianey	Nunez	93647	Very important. Please take this next step for health. Volatilization is an insidious threat. Please act quickly to protect the public, especially children, from this serious danger.
Susan Kathryn	Blain Rose	1440 80205	We all suffer from pesticide misuse. We already have more pollution on this planet than we can handle; why poison people, animals, water and land to a further degree in the name of greed?
Jo-Ann	Sramek	55811-3914	We are a sick nation as it is, meaning Americans health suffers enough already.. Let's not make things worse, please.
Josefina	Dominguez	88005	We are all living beings and not material for profit and renders non ethic!!!!
Egli	Veronika	9479	
Janet	Dielen	53235	We are also praying for this intention. We are endangering our children and our future by allowing the giant chemical companies to continue poisoning our air, soil, and water with their highly toxic pesticides and herbicides.
Charlene	Woodcock	94709	Please bring the EPA back to its mission and protect us from these toxic products.
manjari	chatterji	54956	We are seeing major reduction in the numbers of familiar insects in our yards. The science is in; please use your authority to prevent another Silent Spring, thank you.
kathleen	jackson		We can easily exist, grow and harvest without the use of toxic pesticides. Leave it to nature and protect people, animals, birds and insects from the toxicity.

Linda	MacKay	92252	<p>We can no longer afford to ignore this problem. Families are suffering.</p> <p>We cannot let our children continue to be poisoned by the reckless use of powerful chemicals. We need to act responsibly and with due diligence, and not allow human populations to be the subject of widespread experimentation.</p>
Kathryn	Kassem	91016	<p>We cannot poison the soil, our food, and our people to good health. it is an insane concept and the farm workers are on the front lines with damage to their children's brains, ability to learn and all their lives. Our government should be protecting the earth and the people not destroying them.</p>
nancy	poer	95667	<p>We can't continue to further endanger kids as well as workers and neighbors.</p>
Vic and Barby	Ulmer	95070	<p>We don't need to simply gauge what poisons are drifting, but we need to completely eliminate any and all life killing pesticides currently in use, to be replaced with "Eco-friendly" remedies. There are plenty of them available, that once implemented will get back and retain the balance of nature, not destroy it, as it is now.</p> <p>"Do No Harm!"</p>
Nancy	Smith	96003	<p>Earnestly,</p> <p>Nancy Smith</p>
William & Katr	Dresbach	44054	<p>We don't want any spray's or GMO'S</p> <p>NO POISON'S ON OUR FOOD</p>

John	Grillo	4473	<p>We find in the chemistry of chemicals both friend and foe. In the case of "pesticides" (or insecticides), they are more foe than friend, that is, when used in an irresponsible and neglectful manner. It's not enough to have knowledge of dire consequences incurred only, when using products that can, and do have, a direct impact on our health. What is needed is FORESIGHT, and the awareness of consequences of not being able to discern, or, see clearly the many implications (including both side effects observed, and its aftermath) of using hazardous products in a haphazard way.</p> <p>We have enough chemicals in our lives causing illness as it is, we don't need more</p>
Sandra	Shilko	64152	<p>just to let thechemicla companies make more money on human illnes</p> <p>We have fields on two sides of our lot and I garden organically, so pesticide drift is a concern for me.</p>
Margot	Tollefson/Conard	50249	<p>WE HAVE HIGHEST ILLNESS AND MORTALITY RATES OF DEVELOPED WORLD.</p>
Sharon	Kansas	87537	<p>THIS DESTROYS OUR ECONOMY-NO!!</p> <p>We have the right to know how many pesticides are drifting into the air we breath. Living in Napa Valley concerns me due to the abundance of vineyards we live by that are being sprayed.</p>
Diana	Velazquez		<p>Thank you</p>

kimberly	rosa		<p>We have to go inside while they're spraying here, especially if there's any kind of breeze. Now we're told that those toxins can last for days! i'm supposed to keep my children away from home or locked up in the house for 3 days after each spraying!</p> <p>PLEASE do something about this.</p> <p>We knew about pesticide drift in the early 1950's when my father put out the first orange-colored signs with DDT warnings not to enter our orange grove for a certain number of weeks. Since then the San Joaquin Valley of California has become not only a cesspool with contaminated aquifers loaded with pesticides but toxic air and soil besides. "Cancer pockets" seen in the small towns that affected migrant farmer's children were rampant in the 1980's....and now it's 2014! Please take care of this horrific situation.</p> <p>We live near corn fields and have NO butterflies, hummingbirds, or bees anymore. In Northcentral Indiana. And it is like that for miles and miles around here.</p> <p>We must do all that we can to bring farming into a sustainable balance for all that breathe!</p> <p>We must learn compassion, fair play, and justice. Stop the environmental racism so often involved in pesticide spraying.</p> <p>We need enforcement and monitoring in the application of pesticides. Please do so.</p> <p>We need to progress towards organically growing all food products, for the health of humanity and the Earth. Let us move in that direction please!</p>

Marcela	Hernandez	78209	

marielena	ayala	92882	We need to protect our children living in rural areas!! This is a crime to expose them to chemical drifting!!!
Mary	Stewart	90744	We need to protect the lives and health of all our people.
Leon	Trumpp	65301-5238	We need to totally phase out pesticides and herbicides .
			We teach English to immigrants in the lower Coachella Valley. A number of their children have autism or other developmental abnormalities.
Carol	Nolan	92236	Please, please, do more to protect them!
CARLA	DAVIS		We the People have the right, as citizens, to have our health & safety protected from toxic chemicals!!!
			We unwillingly ingest pesticides every day and absorb them through our skin, lungs, etc. I think the EPA should ban the use of these chemicals, but all action to restrain them is welcome.
Agnes	Puntch	94572	Over 90% of us have glyphosate in us, a chemical which is responsible for many serious health problems, many of which have delayed action.
			We urge EPA to finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results. Children and families in rural areas deserve no less.
Barbara Annar Wood		19135-1428	We urge EPA to finalize the volatilization screening tool, move quickly to implement the assessments and take effective and timely action on the results. Children and families in rural areas deserve no less.
Errikka	Jordan	19135-1428	Errikka Jordan

Martha	Deputy	42101	What about herbicides used on corn and soybean fields?:
bill	williston		What about lawn treatment pesticides?
john	everett	55912	what chemical company pays out the most in campaign donations? who gets it? what is their vote?
MaryAnn	Koch		What good are the tools if no one is monitoring the behavior. This is an extremely serious threat to the American people and people who are receiving our products. Get it done!
mary	rojeski	90405	WHAT IF IT WAS YOUR CHILDREN LIVING NEAR THIS????
			When 68 pesticides fail your screening test, it is time to act immediately to implement regulations that will stop volatilization drift.
Sigrid	Asmus	98199	I hope you will lead the EPA to stop allowing indiscriminate spraying of dangerous pesticides in locations where they cause serious health problems to children, families, and rural communities. You are our lifeline; please act immediately to protect our farm workers!
Norm	Conrad	98103	When does the EPA work for us instead of the chemical companies?

Aaron Langton 94705

NAOMI BLOOM 97201

Julie Combes

Eleonore Lee 78210

When I recently visited a farm near Davis, CA, I was told that they only drink bottled water because the ground water in the area is so polluted/contaminated from agricultural pesticide use.

Thank you for making this petition possible and helping to preserve all of the water we can.

Sincerely,
Aaron Langton,
Berkeley, CA
When will EPA address the larger issue of unregulated pesticides in the air around all of us?
Why does the U.S. lag so far behind Europe in banning dangerous pesticides of all kinds, including those responsible for the destruction of thousands of bee colonies. It is almost as if the organization were in the pay of powerful interests intent on profit at any cost, whether to man or nature. Why is the whole population not seething with outrage at this apparent disregard for the life and safety of all who inhabit this 'great' country/?

Workers and neighbors are being harmed by pesticide drift. This has to be addressed. We cannot pretend that wind does not exist, cross-contamination does not exist, or human health does not exist. Admitting that these in fact exist, and matter, action must be taken. There is not other choice, now do you f-ing job and protect the health of people and the environment we live in.

Gayle Janzen 98133

Would you want your family to be exposed to pesticide drift? If not, then do the right thing and finalize the screening tool, which is a very small step in protecting people who are subjected to these dangerous chemicals. What you really need to do is ban them, since they are destroying our bees, birds and the environment. I can't figure out why humans decided that dangerous chemicals were good for us.

Richard Soto 95204

You need to listen to the ballad by Tish Hinojoso entitled "Something in The Rain"

This is not a new problem or concern. You people at these large corporate and family owned lands have a lot of audacity to allow chemicals to be sprayed and then settle throughout the areas and allow children and the elderly and all others to suffer all sorts of ailments, diseases and other effects, all in the name of profits. You people could care less and that is the biggest shamle of shit that I can even imagine! You have no hearts and no souls! Please stop spraying this crap and effecting children. Just saying.....
